SOUND CURRENCY DISPLACING PAPER IN SOVIET RUSSIA

MOSCOW, Aug. 13.—Russia is gradually working into a new monetary system, based upon actual values in gold or negotiable securities, which promises soon to eliminate the billions of paper rubles now flooding the country.

At the present time a dual currency system prevails, the one based upon the new standard, the other upon paper emission.

The new money, known as "cherovonetsa," the old Russian name for gold pieces, is paper currency issued by the state bank in units equal in value of ten gold rubles of the pre-war issue, and supposedly redeemable in gold upon presentation.

Silver coins, in ruble and fractional denominations, have been minted, but not yet issued. The financial authorities are awaiting the time when "cherovonetsa" are in general circulation to issue the silver money which will replace the present ruble paper as fractions of the state bank notes.

American, English, French, Dutch and other currency are now in free and general circulation in Moscow, but gradually find their way back into the state bank which, whenever possible to persuade clients to do so, pays out the "cherovonetsa" in order to accustom the people to their use. They are well made notes on excellent paper, slightly larger than American currency.

Russia today is very short of money, the circulation "in cheovonetsa" and paper rubles being only slightly more than the value of two gold rubles a head of population. It is hoped to increase this gradually, but to issue very little more paper unless there is actual value, or anticipated revenues, behind it.

CAPITAL NEEDED FOR U. S. FARMS

Agriculture Must Re-invest
\$10,000,000 For New
Equipment

WASHINGTON, Aug. 13.—American agriculture, which has been turning out a capacity product with its physical equipment in a run-down condition, must within the next ten years save up and reinvest in the farm plant from \$8,000,000,000 to \$10,000,000,000 of new capital, according to economists of the department of agriculture, who say this is a conservative estimate.

"For three years farmers have patiently patched, mended, repaired and used makeshifts," an official report says. "Sometime in the coming decade the farm must have about the same replenishment and renewal of productive plant that the railroads are now going through. Before 1933, three-fourths of the farm buildings will require new roofs and new paint. Probably a half-million new houses, barns and auxiliary buildings will have to be built. Half the present mileage of fencing will have to be replaced and much new fence put up. Millions of new tile must be laid. The haying and harvest machinery will have to be replaced almost entirely; tillage machinery in large part; wagons, harnesses, etc., in part. Millions of tons of new piping, wiring, barn equipment and small tools; millions of new gas engines and stationary power appliances; millions of tons of fertilizer and lime must be poured into the soil of the east and south to restore pre-war fertility. The country's work horses are old and before 1933 almost a new crop must be raised.

"The men who control great capital resources must realize agriculture's real and unusual need for new capital; and they must realize that farming in this country is still a basic industry, an industry with a future that will pay ample returns on every dollar wisely invested. One of the rural community's very serious problems during the next five or ten years will be debt."

UTAH GETS BIG TRACK OF LAND

SALT LAKE CITY, Aug. 13.—Title to 2,500 acres of school section land in San Juan county, about five miles north of Monticello, has passed to the state, as a result of the decision of the United States land commissioner, holding that the land is non-mineral.

CUPID IGNORED BY ROYAL PAIR

TOKIO, Aug. 13.—The prince regent and his betrothed Princess Nagako Kuni, recently had the first opportunity for a tete-a-tete since their engagement was announced. It would, however, not be considered very interesting to the average young American. The talk,

according to information given the press, was confined to a description by the prince of his visit to Formosa, while the princess told of her trip through western Japan. The conversation took place at a banquet given by Prince Kan-in which had been specially arranged for the purpose.
