GAME IN VIENNESE MARKETS PLENTIFUL

Hare Drives are Principal Source of Food For Market; Even Poor Have Birds

VIENNA, Dec. 13.—In probably no city in the world is so much game to be found, in season, as in the markets of Vienna. Partridges and pheasants were lately seen in every shop, even in the poorer quarters, and now the hare-drive season is on and cartloads of them are common. They are the large European hare, ranging from six to 12 pounds, and form one of the principal food articles of the country.

These hares are killed in huge ring drives. Often from ten to 50 or more guns are invited and, with one or two beaters between each gun, the ring of shooters and drivers, sometimes a mile in diameter,

slowly closes in. As shots are directed groundward there is little danger to the hunters. It is not unusual for 1000 animals to be killed in one day's shooting.
