

Glee Club of '84 Recalled By Funeral

The late Woodrow Wilson organized the Glee Club of Johns Hopkins University... He was a post-graduate student at the time. One member was Charles H. Levermore...

the survey of the region will have been practically completed. Return will be by way of Point Barrow, Nome and Seattle.

LOVE LETTERS SHOCK

PARIS, Feb. 13.—Andre de Fouquieres, who is universally accepted in France as the highest authority on social etiquette, has been asked to rule whether a member of society, of the male sex, should see a typewriter for a letter to another member of society, of the female sex, if the letter is not strictly limited to business matters.

Decidedly not, says M. de Fouquieres. "The most elementary social feeling and the simplest common sense," he declares, "is responsible even to bringing a typed letter before a woman."

The prestige of Herald Want Ads has been attained not merely by the paper's large circulation but by the fact that all of its readers are interested in our Want Ads.

NEW BUILDING IN DETROIT WILL BE 552 FT. IN HEIGHT

DETROIT, Feb. 14.—Already spread across sheets of blueprints Detroit's tallest building will be written in concrete across the downtown skyline before the end of 1925, when the 22-story "town house" of the Aviation Town and Country Co. is completed.

It rises 152 feet above the ground, the building will be topped by a 100-foot Zappella tower in which the city of Detroit has granted as a gift to the United States Navy's Shenandoah airship.

and splendor any similar clubhouse in the world, with its great swimming pool, large enough for water polo, its golf course to accommodate 75 persons at one time, its many other social features and the 14 floors of living quarters for permanent and transient members.

Cost of the "town house" will be \$2,000,000. The financing, which will be without assessment of taxes, is in the hands of the Board of Directors, whose dream of making Washington Boulevard the "Fifth Avenue of Detroit," thus is brought nearer realization.

The Aviation Club building will be a new base, Fred W. Warner says, for the family, as well as the individual, who has a country house and 250 acres of land in the country.

WASHINGTON G.O.P. CONVENTION APR. 5

SEATTLE, Feb. 14.—The Washington state republican committee today decided to hold a convention at Wenatchee, April 5.

INDIAN PAYS FINE

Denson John, Indian, donated \$20 to the city treasury this morning which was the amount assessed by Police Judge Gargagen for the privilege of using the streets of Klamath Falls as a place to get drunk.

TO SEEK RICHES IN FAR NORTH

WASHINGTON, D. C., Feb. 14.—In its latest search for valuable mineral wealth the government is sending a party of expert geologists and topographic engineers on a midwinter expedition to the tip of Alaska on the Arctic, to survey some 30,000 square miles of uncharted wilderness, rugged mountain chains and large stretches of undulating treeless plains.

A few days ago the geological survey told of the plans to send, at the expense of the navy department, a small party of government technicians to northern Alaska to survey lands embraced in the navy's largest petroleum reserve, but little could be gathered from the brief announcement as to the hazards and hardships this little band of men probably will face once it leaves the ice-free harbor of Seward to travel by railroad, boat, dog-sled and canoe with four or five tons of supplies, and before it completes its reconnaissance at Dease Inlet, 25 miles east of Point Barrow.

Much of the region south of the reserve already has been surveyed by a party under direction of Dr. Philip S. Smith, leader of the party now on its way to the far north, and portions east of it also have been examined by J. D. Merritt, another member of this winter's expedition.

The present party, in addition to Dr. Smith and Merritt, will consist of William T. Foran, geologist; Gerald Fitzgerald and R. K. Lynn, topographic engineers and several assistants. It will enter the region from the south, starting in midwinter when some of the transportation problems are least difficult. It will be left on its own resources for at least six months, and tons of supplies will have to be transported, mainly by dog-sled, for 400 miles, even before reaching the reserve.

At Tanana, dog teams will be purchased and packers, camp hands, and dog-team drivers will be employed. From Tanana the technical members of the party will go north with four teams, comprising 30 dogs, followed by slower freight teams. From Ne-

nana the route leads down the Tanana river to Tanana, thence along the trail overland nearly 100 miles to the little mission of St. Johns-in-the-Wilderness. From here the route will follow the Alutna river, a tributary of the Koyukus, which rises in the high, rugged mountains that form the southern border of the naval reserve.

About 150 miles up the Alutna, the northern limit of timber lands, the party will establish a headquarters camp from which it will explore the adjacent regions for distances of 50 miles or more and search for a pass across the mountains, waiting for the dog freight to catch up.

From here on for a distance of 700 miles, over a vast stretch of tundra, the expedition will have to use kerosene for cooking food which will consist of moose, mountain sheep, caribou, ptarmigan, fish and the small black bears of northern Alaska, the latter to contribute materially to the provisioning of the dog teams.

These explorations will determine the most feasible pass across the mountains, and when that has been found, the party will move north and to the drainage basin of some tributary of the Tanana river. Here dog teams will be cached with enough supplies to last four or five weeks of the summer. The expedition will then push north to the west, following the northern front of the mountain range, in an attempt to find a pass over it into the drainage basin of the Tanana river.

By this time the summer season will be near at hand and absolute no longer will be possible. One party of four will then return to the region on the headwater stream of the Tan-

ana, while the other remains on the tributary of the Tanana, and awaiting the breakup of the streams after which the rest of the journey will be made by canoe.

After the ice breaks, the parties will descend the streams, mapping them and the surrounding country in addition to making geological explorations. The Colville party later will make a portage across country to the Chitina or Ikiptukung river and descend it to Dease Inlet, a bay about 25 miles east of Point Barrow. After also enters this inlet and when the two parties meet her-

Idle Acres Yield No Profit

PROFITABLE crops should be growing on that un-cleared land of yours—productive instead of idle acres. And blasting stumps is now much cheaper and easier.

Pacific Stumping Powder is clearing land quickly and cheaply for the ranchers around here, because there are about 143 sticks of 1 1/2 x 8 of Pacific Stumping to the 50-pound case. You will get one-half more sticks for each dollar spent for explosives for land-clearing when you buy Pacific Stumping. It has the same strength as other standard stumping powders. There is no danger of its freezing, nor does Pacific Stumping cause a nuisance from handling.

Let us supply you with explosives this year. We carry large stocks of du Pont dynamites for all blasting purposes on the farm. Tell us your job and we'll tell you the cost.
