The air in the incubator is no better than the air in the room. Special means should be provided in the incubator house to care for the heavy gases. Large pipes placed near the floor level and opening outside will help the situation. The lighter gases will escape through the windows.—O. A. C.

## GROCERIES, MONEY PURSES DROPPED IN MAIL BOXES

SPOKANE, Wash., Feb. 28.—

Various residents of Spokane, some absent-minded, others temporarily preoccupied, furnish the humorous side to the daily work of Spokane mail carriers, according to John O. Wahlstrom, superintendent of city mail carriers. On an average of once a day, he estimates, articles ranging from groceries to money, find their way into mail boxes scattered throughout the city.

"Most of these people are women who drop their purses into mail boxes instead of letters," Wahlstrom said. "One business man was on his way to the bank to deposit his daily receipts, amounting to about \$500. When he observed a mail box he dropped the money and pass book into it."

One carrier found a purse in a mail box containing only the owner's card. Upon being called, the woman assured the postal authorities that she had such a purse but that it was at her home and contained all of her money. An examination, however, proved that the purse was gone. It is believed to have been stolen and the thief deposited it in the box.

Some time ago a cat was found in one of the parcel post boxes. According to Wahlstrom, articles found most frequently include lodge pins, powder puffs, handkerchiefs and groceries.

Potatoes in some storage places are beginning to sprout. They need to be well aired out to keep them from heating and from getting worse. Where they are to be held for a long time it may be advisable to spread them out in shallow layers, either in light of dark places and if cool enough little sprouting will occur.—O. A. C.
