

Pacific Coast News In Brief

SEEK MISSING EXPRESS AGENT AND FUNDS

SAN FRANCISCO, Cal.—State-wide search has started for George Lister, for three years agent for the American Railway Express company at Sausalito, following the disappearance Monday morning of a shipment of \$14,000 currency from the Wells Fargo Nevada National Bank of San Francisco to the Bank of Sausalito.

SUIT FOR MILLIONS MAY BE DROPPED

Los Angeles, Cal.—Whether Herman L. Roth, Los Angeles and New York attorney, recently convicted and sentenced for extortion, will prosecute his suit for \$2,450,000 against Princess Hassan, scheduled for trial tomorrow, is not definitely known. Herbert Cutler Brown, attorney for the defendant, whose true name is Ola Humphrey Hassan Broadwood, formerly of Oakland and widow of the late Prince Ibrahim Hassan of Cairo, Egypt, stated he was anxious to have the suit tried.

SNOW PLOW REACHES SNOQUALMIE SUMMIT

ELLENSBURG, Wash.—A wedge plow pushed by two tractors in charge of a state highway department crew reached the north end of Lake Keechelus, on Snoqualmie pass, and indications today are that the road will be opened as far as the summit after next Sunday, breaking all past records by approximately two months, according to C. O. Eldal, district highway maintenance official. May 15 is the earliest date the great cross-state highway has been opened in past years.

NEW WEEKLY APPEARS IN GRANTS PASS

GRANTS PASS, Ore.—Number 1, volume 1, of the Southern Oregon Spokesman has come off the press and is being circulated about the city and in neighboring towns. The newspaper is a weekly, devoted principally to editorial matter dealing with national and local politics. It also contains a number of news items although the stress will be placed on the editorial column. It is to be published every week by the Southern Oregon Spokesman Publishing company of this city. William H. Greene is managing editor of the new paper. It is sponsored by a group of Grants Pass men.

RADIO PLANNED FOR JACKSON MINE

JACKSON, Cal.—Establishment of radio communication between the surface and the lowest depths of the Argonaut mine for use in mine disasters or other cases of emergency is the aim of a group of Stockton and San Francisco men who are conducting a series of experiments here.

WEED CEREMONIAL OF LODGE INITIATES FIFTY

WEED, Cal.—Dramatic Order, Knights of Khorassan, held a ceremonial in Weed, Saturday afternoon and evening. This is a branch of the Knights of Pythias lodge and was attended by members of this organization from all parts of Southern Oregon and Superior California. Saturday afternoon there were parades and band concerts for the public on the streets. The ceremonial was held at night, there being about 50 candidates.

SPOKANE EXPECTS BIG LUMBER CROP

SPOKANE, Wash., March 12.—Lumber production and sales in the Inland Empire for the year 1924 are generally expected to exceed last year's record breaking cut and delivery, according to statements issued by prominent operators and timber men throughout this locality.

The general trend of opinions points to a heavy production with a corresponding delivery business. Belief that the 1923 figures, which surpassed all known records in this section, will be shattered, has been expressed on all sides.

Increases in working forces, both in the mills and in the woods, have been effected by some operators while others contemplate similar changes in the near future.

Some of the mills report a large reserve of logs on hand with prospects for a 10 per cent larger cut than last year.

MARKET REPORT

PORTLAND, March 12.—Live-stock steady. Eggs steady. Butter and butterfat steady.

BUSINESS MAN GREAT PRODUCT OF PRESENT DAY

(Continued From Page One.)

used them like sledges against the obstacle he was trying to overcome. If his money held out long enough he would beat down opposition by brute force. If not, as in the attempt of the French to build a canal across Nicaragua, a bitter failure.

The old manner of business was characterized by offensive destructiveness.

Compared to this the new business is characterized by the two words, defensive constructiveness.

The American business man gradually came to realize that the working man could produce more, would live longer, would be happier, if his health and living conditions were looked into. When the Panama canal was built, Vining pointed out, working conditions were made sanitary and the work was made easier for the laborers.

Defensive for Working Man.

In other words, he explained, the new attitude is a defensive for the working man and a constructiveness instead of a breaking down to accomplish their ends.

"The change from the old to the new is the greatest triumph of Christianity," he declared. "The American Republic has dignified labor and given the laborer the opportunity of working under healthful conditions. And out of this the American theory of superiority before authority has been evolved."

"In this country a person in authority has no power unless he can definitely prove his superiority. To be a leader, a man should have a broad general knowledge and education of the world. The newspapers, magazines and people in general are his text books.

Must Be Superior.

"In addition to this requisite, he must be far superior to the average person in some special line of business.

"The average American is individualistic and hence difficult to adjust himself when he comes to a new community. The proper manner of adjustment," Vining said, "is to accept all the conventions of the new community and look upon everything from their viewpoint. Continue this until you become one of the crowd through association.

"There are six zones we should keep in mind, the zone of supreme achievement, the zone of achievement, the zone of convention, the zone of discontent, the zone of the criminal, and the zone of the hopeless. The climb upward or the slide downward starts from the zone of convention.

Felicitated Klamath Falls.

Vining felicitated Klamath Falls on the campaign for recreation grounds. Concluding, he painted a word picture of the future Klamath Falls and the railroads to be built here soon.

RAIL PROBLEM UP THURSDAY

The railroad committee of the chamber of commerce will meet at 4:30 Thursday afternoon when consideration will be given to selection of a committee to appear at the interstate commerce commission hearing in Portland, March 26, and to the stand the chamber will take at the hearing.

At this hearing an examiner for the commission will consider Public Service Commissioner Corey's complaint for more railroad building in Oregon. Corey demands construction of a road from Crane to Odell. According to Secretary Linn P. Sablin, the committee will welcome anyone who has suggestions to offer on the stand to be taken at the hearing.

WINE CHEAPER THAN WATER

BUDAPEST, March 12.—Water has become more expensive than wine in Budapest because of the special water taxes imposed to increase the city's income. The Hungarian government found the tax so burdensome it was forced to disband the Budapest city financial administration.

BRAZILIANS THINK ALL AMERICANS RICH AND BOOST PRICES

RIO DE JANEIRO, March 12.—"American Millionaire" is one word or should be hyphenated at the very least, in the opinion of most Brazilians. It is doubtful if many citizens of this country could be brought to believe that there exists a "poor American," or even one in "moderate circumstances."

Perhaps the motion pictures are responsible for some of this golden glamor. The film millionaire is always an American. The traveling American, however, must assume the rest of the blame. His generosity is famous. His tips are bigger and he pays bigger prices than anyone else. In fact he rather enjoys his reputation for reckless spending.

But while the American may enjoy a sense of generosity, he likes to believe that his spending is a matter of free will. He has no patience with being over-charged just because he is American.

For this reason, visiting and resident Americans are frowning over the adoption of a double scale of prices by the hotels, restaurants, and certain other business houses of this city, one set of prices being for Americans and the other for Brazilians.

The plan to make Americans pay more than others was described in a story published in the Journal de Commercio. The abnormal exchange situation was advanced as the reason. The dollar is now worth three times as many milreis as it was a few years ago.

While the general increase in the cost of living has cut the purchasing power of the milreis in half, the dollar has steadily climbed in value, and the Brazilians feel that the Americans are getting all the best of it.

By charging special prices to Americans, the article says, the Rio de Janeiro hotel and restaurant men are killing two birds with one stone; they are increasing their receipts, and at the same time are able to keep prices down for their Brazilian customers.

There is a tendency to include other foreigners in the special price scheme on the suspicion that their income is established on the gold basis, but Americans are the main objective.

The visiting American, if he does not like the special price arrangement, can cut his visit short, but the resident who is obliged to remain for business reasons is out of luck—especially if it happens that his salary is paid in Brazilian money.

A new-tone-sensitive safe lock that opens only to a tuning fork tuned to the Esquard pitch is on view in Birmingham, England, according to reports from that city.

FIND NEW WAY FOR CONVERSION OF WOOD WASTE

UNIVERSITY OF OREGON, Eugene, March 12.—(Special.)—A second successful process for the conversion of wood waste into a product that may be utilized on a commercial scale, has come out of the chemistry laboratory of the University of Oregon.

Prof. Q. F. Stafford, professor of chemistry, first succeeded in working out on the Eugene campus his process for the utilization of mill waste in the carbonization and wood distillation industries. Dr. Alfred Tingle, former research chemist for one of the leading pulp and paper mills of Canada, has brought to perfection in the university laboratory a new process for producing paper pulp from wood in which shavings and similar "cull" material of the ordinary paper pulp mill may be included to give a satisfactory pulp for making a heavy grade of dark paper.

All danger of overcooking smaller pieces of wood waste while larger pieces remain uncooked is avoided in Dr. Tingle's method. Another important feature of the new process, according to Dr. Tingle, is that it can be carried on with a much simpler and less expensive plant than is needed for any other form of pulp.

The application of Dr. Tingle's digestion method, which he believes may prove applicable to Northwest fir wood and at the same time cheap enough in operation to use in connection with waste products, is expected to be of great importance to the lumber industry. When the new process is applied to high grade spruce chips the product

may be considered, for many purposes, a competitor with kraft pulp.

Dr. Tingle was invited to complete his research in the university laboratory and he accepted the courtesy while on a visit to Eugene. Miss Lillian Tingle, professor of household arts at the university, is a sister of Dr. Tingle.

Dr. Tingle's process involves a double treatment of the wood. The chips or shavings are first digested under pressure with a solution made from lime and sulphur. The product is then crushed to a fine, soft pulp in certain very cheap acid which in itself at present only a waste product from another manufacture. The washed pulp can then be made into a very good grade of paper which, research chemists believe, will compare well with that made from kraft.

Baryard manure applied now to the home orchard or garden soil will be of greater benefit than if applied later. Manuring may be done at this time if the ground is not so wet as to cause it to later bake or harden due to the hauling over it. Well rotted manure is preferred to the fresh.—O.A.C.

Get Two Trial Boxes

PAZO OINTMENT is a Guaranteed Remedy for all forms of Piles.

Pay your druggist \$1.20 for two boxes of PAZO OINTMENT. When you have used the two boxes, if you are not satisfied with the results obtained, we will send \$1.20 to your druggist and request him to hand it to you.

We prefer to handle this through the druggist because his customers are usually his friends and will be honest with him.

PARIS MEDICINE COMPANY, St. Louis, Mo.

JAPANESE ARMY BEING REDUCED

TOKIO, March 12.—The final list of Japanese army officers dismissed as a part of the army reduction policy adopted by the government in 1922 has been published. It includes 13 lieutenant general

als, 40 major generals and 180 colonels. These are the last of the 1,800 officers dropped in the reduction of the land forces, the dismissals having spread over nearly two years. The reduction also decreased the standing army by 66,000 enlisted men. The peace strength of the Japanese army is now approximately 250,000 men.

Convinced that highway advertising signs detract from the natural beauty of the great routes of travel of the Pacific Coast, this Company has decided that it will erect no more such signs and that it will immediately remove all of its signs of this nature now standing. Hereafter the Company will confine its use of signs to commercial locations.

The Company feels that the splendid scenery so characteristic of nearly all of the highways of California, Oregon, Washington, Nevada & Arizona should be unmarred, and on that account is willing to sacrifice the advertising value of the signs.

STANDARD OIL COMPANY (California)

The New ESSEX

A SIX—Built by Hudson

We Ask This Simple Test

It is an easy way to tell if the new Essex Coach gives greater value than was ever provided at this price.

Take a ride. It has answered the question for thousands. Priced \$170 lower, the new Essex Coach provides a larger, handsomer body, with even greater passenger comfort than the former Coach.

And its 6-cylinder motor, built by Hudson, gives the smoothness of performance for which the Super-Six is famous.

Has Qualities of Both Hudson and the Former Essex

Steering is as easy as guiding a bicycle. Note how comfortably and safely it holds even the roughest roads at all speeds.

Gasoline, oil and tire mileage are exceptional. A further satisfaction is the low cost at which all replacement parts are sold.

The Coach \$975

Touring Model - \$850
Freight and Tax Extra

A 30 Minute Ride Will Win You

ACME MOTOR COMPANY
400 So. 6th Street

ONE OF AMERICA'S STRONGEST COMPANIES

Your wife NEEDS this protection every day—

\$5,000 if you die from natural causes
\$10,000 if you die from accident

and in case of permanent total disability the company will

1. Waive all premium payments
2. Pay you \$25 per week for one year; and in addition
3. Pay you \$50 per month for life; and
4. Pay \$5,000 to your beneficiary when you die
5. If disability involves loss of limbs or sight as a result of accident, the company will pay you \$5,000 in cash, immediately, in addition to all other benefits.

[In case of temporary disability, as a result of either sickness or accident, the company will pay you \$25 per week for a limit of 52 weeks.]
