## WHIRLING ROUND THE WORLD

MAGELLAN, in his sailor's heaven, should have the news that a British company is establishing an air line intended to circle the globe regularly in 17 days.

A spokesman for the Imperial Airways, a \$5,000,000 concern, has already issued a timetable, lacking only the opening date. The flights will be made by a system of airplanes and airships. The route will be to Paris, thence to Constantinople, reaching there the morning after leaving London. From the Turkish capital an airship liner will make Australia in nine days. Another such liner will forward the passengers at express speed to San Francisco, and big planes will rush them to New York, which will be reached on the fifteenth day. The next two days will suffice to take them back to London in an airship. The lighter-than-air craft will be Zeppelins.

This makes even a hardened tourist feel a bit dizzy. It makes anyone but a confirmed speed fiend wonder, too, why no provision is made for sight-seeing. What is the use of going around the world, if you can't stop on the way and look at the interesting places, getting into touch with strange cities and races? Yet for sport and business purposes such a transportation should have a powerful appeal. There will be rapid transit par excellence. There will be a big patronage, too, regardless of cost, from those who want to take a whirl around the globe "just to say they've done it."

As far as the actual traveling is concerned, it will probably be for the most part very monotonous—and restful, for those who can stand the confinement.

## THE SEVEN YOUNG ORATORS

ON June 6, seven orators of high school age will meet in Washington, D. C. to conclude the national oratorical contest on the Constitution of United States. Each of these young speakers represents a section of the nation covering several states. Each one has won first place, first in high school, then in city, county, state and zone. When they give their orations in the capital, the members of the Supreme Court will judge the winners and the President of the United States will preside.

The final contest will be of tremendous interest to those seven speakers, to their proud families and to the communities from which they come. But the weeks of work which lie behind it are also of interest. One newspaper editor sums up his faith in the value of the national competition in these words:

"There have been many high school contests in our country, but none perhaps that is so far-reaching as this one in which more than a million students have taken an active part. School instructors tell us this contest has done more to awaken interest in our laws and government and to create respect for our fundamental law, the Constitution, than any other event in our history."

One of the most surprising revelations yet made in any of the Washington inquiries has been the incidental discovery that there is a prominent bootlegger in a federal prison.

The Italian government reports that it is not going to have any deficit this year. Mussolini should come over here, and learn how to turn a surplus into a deficit.

Congress acts as if it considered a veto a presidential impertinence rather than a normal act of a co-equal branch of government.

A time may come when the man who erects a billboard in a beauty spot will be classed with the man who burns down a forest.

The case of Governor Pinchot goes to show how even the public may be fooled for a time by a man who takes himself too seriously.

The theory is resented that the human race sprung from the ground ape. This puts man up a tree.

Some of the county prisoners have torn down the old county jail. The others are tearing down the city jail.

The Japs do not seem to be in any position to return that call that our aviators have paid them.

Now if we could only stock our underground streams with rainbow people would probably find them.

Sheep may come into Oregon now by being fumigated. They have gotten into the tourist class.

It looks like the Klamath County grasshopper was about ready to hop off.

Most people are on the right road but many are traveling in the wrong direction.

## AH, THAT IS THE QUESTION

## HUNT'S WASHINGTON LETTER

BY HARRY B. HUNT

WASHINGTON, D. C., May 28.—All the big guns of the Republican old guard forces, charged to the muzzle with shrapnel and T. N. T., have been concentrated in a terrific political barrage designed to blast the chances of Smith W. Brookhart of Iowa for renomination as Republican candidate to the United States Senate.

Why this massing of forces is deemed necessary against one individual may be understood when it is known that the man thus opposed by this concentration of stand-pat heavy artillery was—actually, not figuratively—the crack sharpshooter of the American army during the late war and in politics has shown an equal facility in scoring the bull's eyes.

Senator Brookhart is even more hated by the old guard Republicans than is La Follette, and next to La Follette is the most feared. Threats, intimidation, all the pull and pressure that can be exerted by the powers that be in Washington, have failed to swerve him in his fight against the pet policies of the Republican "regulars" and for measures which his party opposition brand as radical and "destructive."

Brookhart was a leader in the fight which blocked the selection of his Republican fellow senator from Iowa, Albert B. Cummings, for another term as chairman of the Senate Interstate Commerce Committee, which passes on railroad legislation. This, naturally, won him the enmity of all the groups and interests favorable to the Esch-Cummings law, which was thus made vulnerable.

He fathered the resolution for an investigation of the conduct of the Department of Justice, which resulted in the dismissal of Atty. Gen. Daugherty and disclosed a story of graft and corruption "influenced" and favoritism that is still uncompleted. In a dozen other ways he has disturbed the peace and the patience of party chiefs who believe that first-term senators, like good little boys, "should be seen and not heard" and should obey the orders of their seniors and paternal party "leaders."

Since Brookhart would do none of these things, and on only has spoken in meeting but has preached doctrines that ring of rank heresy to old guard Republicans ears, the order has gone out to "get" him.

"Iowa Republican, Beat Brookhart," is the admonition in large type heading an appeal being mailed into that state to every registered Republican voter.

"The Republican of Iowa," says this document, "owe it to themselves, their state, their party and their country to defeat Senator Smith W. Brookhart at the primary to be held in June 2."

"Brookhart should be defeated because he is not a Republican, but an insidious enemy of Republicanism."

And so on to the extent of about 5000 words, in which the fighting Iowa sharpshooter is pictured as a man likely to overthrow the whole kit-and-kaboodle of cherished American institutions and ideals, substituting therefore a government more wild and weird than anything Nikolai Lenin ever dreamed of.

"Old stuff," says Brookhart, grinning as he reads the document.

"They said all that two years ago when I was first elected. "This is simply an effort of the privileged interests, headed by the railroads, to discredit and defeat me. My people in Iowa will recognize it for what it is. I'll leave it to them to decide."

Brookhart isn't even leaving Washington in an effort to protect his fences in Iowa. He'll stay on the job here, leaving his enemies no opportunity to slip something across while he's away. And if he's worried or nervous, it doesn't show to date in his trigger finger!

Fisherman found \$10,000 on the banks of the Potomac. Maybe that's the dollar George threw across, with interest.

A bill has been introduced in congress to require the house of representatives to sing "The Star-Spangled Banner" every morning. It's good as far as it goes. But why not require them to spend the entire morning in singing? It would save us a lot of money.
