## THE LAST 5 YEARS

ONLY PACKARD CAN BUILD A PACKARD

ASK THE MAN WHO OWNS ONE

Any car will run pretty well for 2 or 3 years. Some can be made to go 7 or 8.

But the maintenance cost is outrageous—and the racket and rattles kill the joy.

The Packard Six is built good enough to run smoothly, sweetly and economically 7 or 10 years—and does it.

Every mile in every year, a Packard mile is one of comfort and economy.

16 to 18 miles and up from a gallon of gas, 500 to 800 miles and up to the gallon of oil, 20,000 miles and more from the set of tires.

And the last mile in the last year in true Packard style—

Even then a better car than the ordinary car at the end of 2 or 3 years.

Ask us to prove it.

Many prefer to take advantage of Packard's extremely liberal time payment plan to enjoy immediately the advantages of a Packard Six or Packard Eight—purchasing out of income instead of capital, just as practically all other necessities are now bought.
