What a Pity

To waste a day. A pleasant morning drink prevents it always. Think of the days lost by headache, by dullness, by unfitness. Just because the stomach isn't right, or the bowels are clogged by poison. That's all unnecessary. Millions now prevent those lost days by an easy, pleasant method. On rising drink a glass of water, hot or cold. That washes out the stomach before breakfast. Add to that water a little Jad Salts. That makes it delightful and sparkling. Jad Salts are made from acids of lemon and grape, combined with lithia. In an hour comes a wonderful change. The poisons are eliminated. All that makes you miserable is gone. The day becomes sunny, you become fit. You feel as you felt when a child. You gain a day, which otherwise is lost. You place yourself at your best. Try Jad Salts one morning in your glass of water. It will bring a revelation. You will never again let a day start wrong. All druggists have Jad Salts.

Heat

For pain - soreness

Rheumatic pains, soreness, aches, etc., call for heat. The best way to apply it is Red Pepper Rub. This is the modern way. It so excels the old ways that there is no comparison. Nothing else creates such concentrated, such penetrating heat as red pepper. And heat that doesn't hurt you. You feel that tingling heat in an instant. In three minutes it seems to penetrate the depths. Circulation is started, congestion is relieved. Pain and the soreness go, depart. What folly it is to suffer pains so easily and quickly stopped. What folly to let a cold in the chest go neglected. When trouble starts at night, what folly to wait until morning. Keep Red Pepper Rub on hand. Homes which do that save a great deal of pain. Get it now—the very utmost in help of this kind.

BONANZA

In commemoration of Washington's birthday a program was held at the Bonanza high school Friday afternoon. Rev. Rice and Mr. Frank Sexton were the speakers of the day. The main topic was Boy Scouts and their purposes. The boys showed a few of the things they have learned in the short time since their organization, such as saluting, tying different kinds of knots and telling the advantage of each. There was a fairly large audience of interested patrons of the school, to whom refreshments were served after the program.

MIDLAND

The Hooper boys arrived home from Sacramento last week. It required four days to make the trip by automobile whereas one day would have been sufficient under ordinary conditions.

The bright springlike days of the past week came as a welcome relief to most folks in this vicinity, but the few impatient ones who ventured out with their cars found the roads still in a treacherous condition.

H. A. Witherill began dragging the roads Thursday.

Twenty carloads of cattle and sheep were loaded at the Midland stockyards Tuesday and shipped to various California points.

FARM POINTERS

Marquis is a good variety to reseed thin stands of Turkey red or other red wheats in the localities of eastern Oregon where reseeding is necessary says the experiment station. Federation and hard Federation are the two best varieties for thickening thin stands of white wheat. Hard Federation is particularly good because it is such an early variety.

Marlout and Haanchen barley liberally planted on dry lands and Haanchen and Trebbi barley on the irrigated lands of eastern Oregon will help fill the much needed increase of feed production in Oregon, says the experiment station.

Federation wheat planted on the irrigated lands and on dry land sections where good rainfall is present in eastern Oregon will outyield all other varieties, reports the experiment station. Its milling quality is fairly good.

Beekeepers are urged to see that the entrance to the hives are open so that bees may come out on sunny days, says the Oregon Experiment station. By lifting the back end of the hive, the beekeeper is enabled to determine by the weight the amount of stores the bees have. The spring rush may be lessened by setting equipment ready for use now.

Overstocking pasture should be avoided during the early growing season is the information given out by the Oregon Experiment station. The new plants are very delicate and can be easily killed if care is not taken. A better stand can be assured by not pasturing too close at this time of the year.
