## Honesty

Not only is honesty the best policy, it is the only safe policy on which a great, permanently successful business can be built. Honesty in merchandising is coming to be taken for granted and the world of business is revolving more and more into the sunlight of truth.

It has been demonstrated that the manufacturer who is showing a steady increase in the volume of business is one who is making something that the people want, putting honest quality into his product and merchandising it for what it is at a price that shows him a narrow but honest profit.

We are increasing the capacity of our output, have secured more room and are now installing a new oven weighting 60 tons with a capacity of 10 pounds of Better Bread per minute. Many other improvements to be announced soon.

We expect to continue increasing that volume because our entire organization is trained to give our customers the best possible quality and service.
