

A Liberal Interest Plan

THIS BANK pays interest on all sums from \$1 and up remaining on deposit one or more calendar months.

Deposits made on or before the third day of any month draw interest from the first day of that month.

Deposits made after the third day of any month will draw interest from the first day of the following month.

Deposits made on or before the tenth day of January, April, July or October draw interest from the first days of those months.

Your dollars in this bank are earning interest for every calendar month they are on deposit and may be withdrawn at any time without the loss of interest for the calendar month or months they have been with us. On accounts closed between dividend dates, no interest is allowed.

Dividends declared Semi-Annually as of June 30, and December 31.
Dividend declared, December 31, 1924, at the rate of 4% Per Annum.

Assets over \$81,600,000

Write to us for booklet "Banking by Mail" This booklet explains how easily and safely accounts may be opened and how deposits and withdrawals may be made through the mail.

For home and office use
Special \$1.00

LIBRARY TABLES

Suitable for Radio Table
\$5.75

HEAVY TABLE TUMBLERS

A good clear glass
6 for only 25c

STAR GAZERS TO STUDY HEAVENS

WASHINGTON, April 17.—Saturn with his three rings, brighter than at any other time of the year, will open the summer star gazing season on May 2. Saturn will be found in Virgo in the east between Virgo and Libra. Saturn comes into opposition with the sun on that date, a bulletin from the American Nature Association says, and does some things opposed to what the earth does.

By opposition is meant that the earth will be between the planet and the sun. Saturn will be nearer the earth on May 2 than at any other time during the year. The planet will rise at sunset, be on the meridian due south at midnight and set at sunrise.

Although one of the more distant planets, Saturn will be just a little matter of 821,340,000 miles away on May 2. Uranus and Neptune are still more distant. Neptune is nearly 2,000,000,000 miles from the sun. Uranus can be picked up as a faint sixth magnitude star if you know just where to look, but you

can never find Neptune without a telescope. The show Saturn puts on will continue in the evening all summer. It does not take a large telescope to see the rings. They will be inclined to the earth at a high angle, so they can be seen to excellent advantage.

Other features on the May star gazing program are the Big Dipper and the huge water snake, Hydra, that fills most of the southern sky below the celestial equator with his two riders, Corvus and Crater. Bootes and Arcturus will be seen in the east, the brilliant Vega in the northeast, and Capella in the northwest.

In the western sky will be Leo, while Denebola, which is in the tip of the Lion's Tail, will be almost exactly due south. Regulus and The Sickle in Leo will be to the southwest of the zenith. Virgo, another of the spring groups, lies just to the east of Leo.

An idea of space in the sky is given by the distance Saturn is from the earth. The size of some of the things to be seen in the sky is almost beyond human comprehension. New measurements of Mira have put her on the front page. Astronomical callipers have been taken to this star and it is found to have a diameter of 250,000,000 miles, outclassing the mighty Betelgeuse and

starting second in birth only to the giant Antares, with its diameter of 400,000,000 miles. The earth with its 8,000 miles diameter would rattle around inside of Mira like a pea in a cask.

Mira is estimated to be a distance of 165 light years from the earth; that is, the light of Mira takes 165 years to travel to the earth at the rate at which it travels of 186,000 miles a second. We see Mira today as it was 165 years ago when the light we now see left this star.

Things could be worse. Bills are usually mailed instead of sent by wire.

The Little Symphony Orchestra Concert will be held at the Presbyterian church Friday, April 17, instead of the Scandinavian hall.

MURDERESS IS STILL IN COMA

Mrs. Anna Cunningham Declared too Weak for Preliminary Hearing

CROWN POINT, Ind., April 17.—Mrs. Anna Cunningham, 49 year old Gary, Indiana widow, who has confessed she poisoned three of her children and tried to end her own life so they could join her husband, "in heaven", still was too weak today for a preliminary hearing on the charge that she murdered her son, Walter.

County prosecutor August A. Bremer pointed out today that the report of Purdue University chem-

ists, received last night, corroborated Mrs. Cunningham's confession.

The chemists found a large amount of arsenic in the vital organs of Walter Cunningham, while admitting that she poisoned Walter, Isabel and Charles Cunningham, denied that she had given Harry any poison. She also told of giving poison to David, Jr. who is in a Chicago hospital.

Help yourself, by helping your country. Buy Horsefly Irrigation District Bonds. Adv. 14-20

NO MEETING TONIGHT
Klamath lodge No. 77, Masonic order, will not meet tonight, according to announcement by lodge officers. The degree work scheduled for tonight will be delayed until a later meeting.

MAGAZINE ARTICLE LAUDS KLAMATH FISH

For the benefit of Klamath fishermen and hunters, the recent edition of "Hunter, Trader and Trapper" has a splendid article on "Trout of the Klamath." The article was written by feature writers who spent some time in Klamath county last fall, taking in the celebration at Klamath Agency as well. Pictures, depicting the Klamath streams, dams and various beauty spots of Klamath county were included in the article, which was written in true western style. The article, printed at the opening of the fishing season, will have a tendency to bring many of the more faithful followers of Isaac Walton over the mountains, according to one of the enthusiasts today.

STEEL WORKS SUED
PHILADELPHIA, April 17.—Suits for the recovery by the government of \$211,000,000 to \$13,000,000 from Bethlehem Steel interests for alleged over payments for war contract on work was entered today in states district court.
