## UNDERWOOD BOX CO. COMMENCES SEASONS WORK

Lakeview Plant Has Been Remodeled; Plenty of Orders on Hand

LAKEVIEW, Oregon, April 27.—The starting signal for a busy season in the lumber industry, echoed over the city and onto the eastern hills Monday morning at eight o'clock when Mack Chilcote, engineer at the power plant of the Underwood Lumber company jerked heartily on the whistle cord and unleashed the old familiar tones of the box factory whistle. None will say but that it a welcome sound and new life and pep and an optimistic smile appeared on local faces. The factory starts the season with plenty of orders on hand and with new machinery and improvements to the plant a greatly increased output will be possible during the coming year. Plans have been made for a continuous run throughout the year and with good market prospects and the announcement of freight reductions, the season of 1926 promises a most successful run.

There are twenty-four men at present in the operating crew, a number of whom have come from outside points, bringing their families to make their home here during the operation of the plant. L. J. Mortenson, who worked at the plant last year, has been made foreman of the plant. J. A. Underwood as president of the company is actively in charge of the management. In the business office a complete set of accounting records have been installed, being modeled along lines of those in use of the Ewauna Box company at Klamath Falls, with John Ward in charge.

A new hand reaw has been installed during the winter. This machine is similar to the big hand used last season, though of somewhat smaller capacity. With the additional capacity, production of the various units of the plant have been equalized and congestion experienced at times last year between the different machines will be overcome, since the two reaws will take

care of the entire output of the cut-off machines. Other changes in the plant which will facilitate production are the lowering of the conveyor from the planer and moving of the lath and strip machine to afford storage space for the reaws which will eliminate much handling. High production figures before the changes and installation of new machinery were around thirty thousand feet daily, while this year these figures may reach forty thousand feet or more, on a single shift. Sustained production will approximate twenty-five thousand feet. Capacity of the power plant is adequate to care for a production of fifty thousand feet in eight hours, it having been designed to care for doubling the production of the mill itself.

### MODOC CAMP

Mr. and Mrs. Griffin went to Klamath Falls last Thursday. The gang saw shut down a little early, and Mr. Griffin thought it would be an excellent time to show his bride of only a few weeks the sights. He reported a wonderful time.

J. E. Mansfield cut his hand rather severely some time ago, and his friend Mr. Lemmon called to see how he was getting along, he met the doctor at the door, and asked—"Hello Doctor, how is the patient today?" The doctor replied, why he is alright, he is convalescing. Mr. Lemmon then said, O, is that so? Well I'll wait until he is through, as I want to see him about something.

W. A. Eastman, the sawyer, moved his wife here, and he doct got very often to Chilcoquin or the Falls any more. Whats the reason Eastman? We thought that you were boss.

Chris Larsen met Ira Ashworth on the road and they pulled up their teams. "Chris," said Ira, "I've got a horse with distemper, what did you do with that one of yours when he had it?" "Turpentine, Giddap!" A week later they met again. "Say Chris, I gave my horse turpentine and it killed him."

"Killed mine too, giddap." John Brophy, Charles Chastain, Red Morgan and Buck Pierson went to see the fight at Klamath Falls last Tuesday. Red and Buck returned back for work alright the next morning, but John and Chas. did not get here until noon, and it was reported by one of the millwrights that they had some refresh-

ments. Well they surely must have had something, as their Ford was ditched.

Harold Hall, the setter made a trip to the Falls last Sunday on a business trip for pleasure, and he called the trip a complete success. Dont spend all of your money for pool Harold.

A fire company has been organized, and the volunteer firemen are busy these days drilling, and learning the ropes. When they get going, their chief Bob Brophy claims that he will have the best company in Klamath county. And by the way Bob intends to make a trip to New York some time this winter and learn how it is done in a big city. He says that he will bring back a lot of ideas of fire fighting. Heres luck Bob.

J. G. Smith took a few of the boys fishing with him last Sunday. Smith claims to know where the best fishing grounds are. Well maybe he does, but anyhow they all came back empty handed. But Smith claims that the fish were not biting, and that the day was too cold anyhow.

At a movie show a bevy of bathing beauties were flashed on the screen. Bob Peely leaned forward and said to an old lady in front of him.

"Would you kindly remove your hat, madam?"

The lady turned around and glared. "Certainly not," she said. "You are altogether too young anyhow to look at what they are showing now."

Lady—Mr. Driscoll, I want to report that the young lady next door continually neglects to pull down her shade while undressing.

Mr. Driscoll—Vey well, madam, I'd be only too glad to look into the matter.

The Modoc company is having spring cleaning. Every one is turning out and cleaning up, and when they are through everything should be spick and span.

John Jacoby, a grader at the mill now, was promoted last week. Good luck John, it is a lot easier than trimming.

Lovely woman—An Indian legend accounts thus for the creation of woman, he discovered that all the Universe was about to create a woman. He discovered that all the material at His disposal had already been employed in the creation of man. Thereupon He took the tortuous windings of the serpent, the clinging capacity of the orchid, the trembling of the grass, the lightness of the leaf, the glance of the gazelle, the brilliance of the sun rays, the tears of the clouds, the tricks of the winds, the tenderness of the rosebud, the sweetness of honey, the cruelty of the tiger the consuming heat of fire, the stiffening cold of ice, and the clattering of the maple. Having mingled all these elements together, He created the female sex.

Two girls were discussing Dewey Gervais.

Liz: "Is Dewey an amateur wrestler?"

Tiz: "No, why?"

"Well, he knows all the latest holds."

Friendly neighbor: "What happened to that dog of yours, Mr. Morgan? I miss him."

Mr. Morgan: "Yes? Well one of the neighbors didn't the other night."

John Strong left the employ of the company today. Among the new employees is D. M. Mess, the well known Californian. He's holding down the chambermaid job to the Fordson.

LUMBERMEN HERE  
W. D. Johnson, of the Associated Lumber and Box company, and G. C. Sealey, a prominent box manufacturer of Oakland, California, left Tuesday morning for California after spending several days here visiting friends and looking over lumber conditions in Klamath county.

BOX FACTORY FORMS  
SAN FRANCISCO.—The Pacific Box factory, occupying virtually an entire block on the northern edge of the North Beach section, was destroyed by fire here last night, with an estimated loss of \$500,000.

TO BUY ROLLS-ROYCE  
With a third of the \$50,000 he lost in the failure of the Scandinavian-American bank of Seattle, and which he will receive next month when the bank settles at thirty-three and one third cents on a dollar, Jack Nelston is going to buy a twin eight Rolls-Royce. The only other machine of this kind in existence is owned by the eminent logging contractor, Phil Bunyan.

STARTS ACADEMY  
Jack Nestor, Pelican Bay electrician, is contemplating founding an academy to teach the fundamental principles of the ancient art of angling. Nestor contemplates charging a fee of twenty dollars per semester. All fighting tackle, must be furnished by the pupils, who must also supply hooks, lines, poles, clothing and food.

## CURTAILING OF LOGGING TALKED AT CONFERENCE

Timber Operators of West Coast Association Agree to Slow Down

PORTLAND, Apr. 27.—Curtailing of logging operations in western Oregon and Washington as a means of stabilizing the industry, was tentatively agreed on at a conference here yesterday, the Portland Telegram says today. The agreement will be put into conclusive form Monday, it is added.

The reason assigned for the action is that receding lumber prices have affected log prices and that until the demand for logs increases there will be still lower prices, says the newspaper.

According to tentative agreements of logging operators they will cease activities June 1 and prolong the July 4 closed period for two weeks at least. Operators attending the conference said this would also aid in minimizing the forest-fire menace.

## Hot - Air - Dogs

With the news that all the current issues of the Harvard Lampoon have been seized by the police and postal authorities, the contraband issue is selling at a premium. We suggest that lumber manufacturer's trade mark their product with snappy pictures stamped on each stick of lumber to overcome the present sluggish condition of the market.

"Yes, of course I love you, Hap," she said, and she took off her shoe.

"Yes, and we'll get married some day," and she took off her stockings.

"We'll have the sweetest little bungalow," and she took off her sport sweater.

"We will have a lot of dear little flower beds," and she took off her skirt.

"Hap, dear, why can't we be married in the spring, when the world is filled with laughter," and she took off her camisole.

"If you prefer the fall, I prefer it too, because we are as one, sweetheart," and she took off her petticoat. (She was an old fashioned girl.)

"Hap, before we go any further, tell me once more that you love me," and she removed the last vestiges of her clothing.

"Hap, honey, I am cold and wish to go to bed. Goodnight." And she hung up the telephone receiver.

Lumberlogues wishes to go on record as being firmly opposed to the present length of women's skirts. We do not disapprove of the fashion on moral grounds, being unable to see how the exposure or concealment of sundry feet of feminine leg can affect the moral welfare of the youth of the land. But we do maintain that the present style is in direct opposition to the lofty principles underlying the Declaration of Independence and our renowned constitution. What chance, we ask, have the spindle shanked, the obese

shanked, the jelly shanked, the bow-legged, and the knock kneed damsels against the shapely stems we see flaunting themselves up and down the street. Surely, a style such as the present one is undemocratic and unfair, and in the interests of those ladies not born with the underpinning of a Ziegfeld star, we contemplate waging warfarra upon the worst skirt until it comes down to a democratic level.

### LAMM'S CAMP

Everybody is giving her the highball around here now, going full speed with one hundred and ten men in camp.

Loading on an average of about twelve to fourteen cars per day with two Best thirty tractors, with another new Best thirty going out on the 23rd, making three tractors and big wheels now in use. Tractor drivers are W. R. (Bill) Hyde, Henry Metzner and W. W. Winghamam.

Using one McGifford loading machine. The famous top loader Bert Gillis, holster John Schuled, Hooker Joe Hammerstein, Jack Cooley, A. Marguis and W. S. Godfrey. Loading sceler Jim Bailey, Woodhuck B. A. Briggs.

Running twelve sets fallers all giving her the Swedish blasting powder. Four bunching teams, Geo. Hagedorn scaling for the fallers and Harry Statton scaling for the bunchers. Stanton was called away on account of sickness of some of his relation in Los Angeles, John O'Connor from up Washington way is filling his position while he is away.

Claude Houghton camp superintendent went into Klamath Falls on Tuesday night where he and Mrs. Houghton attended the big fight of Rieble and Bromble.

E. P. (Ed) Brady conductor on the famous smoke wagon the logging train is wearing a big smile around camp, don't know the reason unless it be a new girl in camp. Brady was very sad for awhile as all the girls working in the dining room were married.

Jim Bailey went into Klamath Falls Saturday night, staying over Sunday, when he came back Monday morning he had to lay off a half day on account of a lame back. Bailey says that he will stay in camp from now on, as he can't afford to lose any time and have to stay in camp next winter and make ties. It's too bad that Bailey can't go into town without getting a lame back, believe that I would stay away too.

Mr. and Mrs. Ceell Lowe, Mr. and Mrs. W. R. Hyde and Mr. and Mrs. W. L. Clement are the proud possessors of each a new three room family house just finished.

Mrs. Ceell Lowe is spending a few days in Klamath Falls doing some spring shopping.

Mr. and Mrs. W. L. Clement went into Klamath Falls on Wednesday afternoon on business.

Have been doing quite a bit of improving in the store and office making the store larger and putting in some new office fixtures. Camp carpenter J. W. Pratt doing the work.

William Birtley, better known as Brandy Bill is carrying a big smile around camp now 'days he has his new false teeth at last. He says that he is going to work hard and save up a big stake for next winter. Hurray, Brandy Bill, go to it.

W. E. Lamm from Modoc Point visited the camp on Thursday afternoon.

613 Klamath Phone 841

### OFFICE PERKS UP

The office of the Pelican Bay Lumber company has been looking very much alive lately, since the addition of Miss Edith McGann to the office force. Miss McGann has a house of her own and a new Ford coupe, and since her arrival even Terrible Terrence Murphy has ceased to grumble about glue in his rubbers.

During the program Secretary Rhodes announced that the man with high score in the pool tournament for each current month would play pool at the expense of the club for the coming month.

Thursday night the club is giving a dance to which members of the club may invite their friends by leaving names with the secretary of the club, who will forward written invitations, to the proposed guests.

### NELSTON FISHES

Jack Nelston went fishing Sunday, and used a pole of his own invention. The salient feature of this pole was a globe of the zinc acid with which Freedland Staley anoints his pitching arm. According to Nelston, the fish leaped madly from the water and slid down the pole into his creel. An exact account of the trip is being prepared for the Paul Bunyan column.

### NEW MAN IN CLUB

Sid Herbert, employee of the Pelican City Community club, has resigned his position. He is succeeded by Walter Henry.

### NEW BOOKKEEPER

Miss Anna Michaelson, formerly with the Insurance firm of Dunbar & Dunbar, has accepted a position as bookkeeper with the McCullom Lumber company.

### SAME OLD STORY

Jack Nelston declares that Bob Kestor's electrical work is on a par with his radio—all wind.
