A very fine car—at a very low price

STUDEBAKER

New Standard Six Coach

\$1295

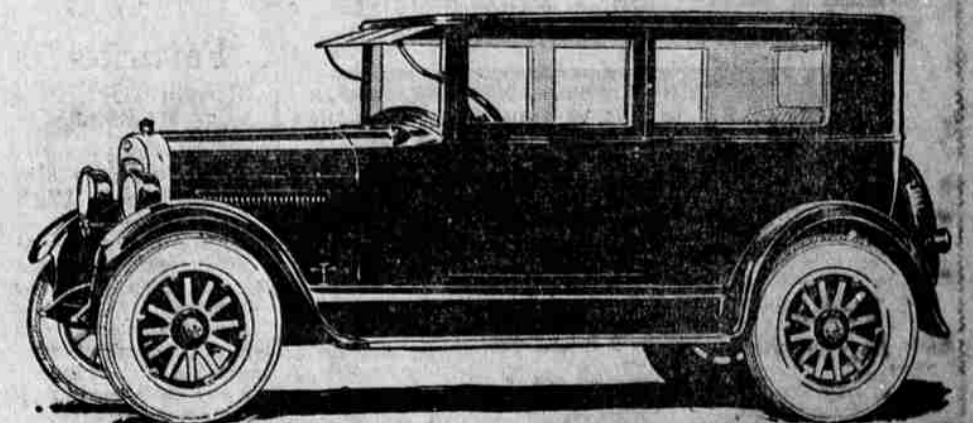

f. o. b. factory
[with full-size balloon tires]

STUDEBAKER has \$60,000,000 invested in plants in which Studebaker cars are manufactured complete, including all bodies, both open and closed. No other large automobile manufacturer that we know of makes all of his own bodies.

This means that Studebaker saves the profit of outside parts makers and body-builders. Thus the price of this new coach is not burdened by an extra profit. At \$1295 it represents a value no other automobile manufacturer can equal.

And no other manufacturer can offer a coach of such fine quality at the price. For every coach that Studebaker builds carries with it traditions of fine craftsmanship that have existed in Studebaker plants since 1852.

Compare this coach with other cars which sell at much higher prices. This will prove that Studebaker values are unequalled.
