DISTINCTION with INDIVIDUALITY

You May Choose the Color and Upholstery of Your New Packard Eight

FROM the very first every Packard Eight has been built with no thought in mind save the quality, comfort and distinction it was to provide its owner.

When you place your order for your Packard Eight you may choose the color of its finish, and you may select the upholstery. Packard will co-operate in producing your own car—a car combining all the grace and beauty of a Packard body with your own good taste in decoration and appointments.

PACKARD

Ask the man who owns one

THE Packard Eight is built in ten body types, four open and six enclosed, ranging in price from \$3750 to \$5100 at Detroit. A liberal monthly payment plan makes possible the immediate enjoyment of Packard Eight ownership purchasing out of income instead of capital.

News from Spain. Caught 30 tons of mardines one night. Maybe packed them into 10 tons. Leather market's slack. Where are cafe's buying their steaks? MOE'S SALE OF PROGRESS BEGINS FRIDAY, JUNE 5TH Watch for Moe's 9th Annual Sale of Progress—Starts Friday, June 5th at 9 a. m.—Adv. 1-2.

Are you running your Balloon Tires hard or soft?

THE original idea back of balloon tires is the added comfort of riding on a soft cushion of air.

Every extra pound of pressure that must be put into a balloon tire to make it serviceable takes away just so much from the cushioning.

Many balloon tires today are run harder than they should be for maximum cushioning.

This is done to save the tires from excessive wear. But here is a Balloon Tire that need not be over-inflated to save it from early and uneven tread wear or tread separation.

You can run U. S. Royal low pressure Balloons at true low air pressure and it won't hurt them. Because—

They have the new "Low-Pressure Tread," which prevents early and uneven tread wear—

And they are built of Latex-treated Web Cord, which gives maximum strength and flexibility.

No matter what your experience with other balloon tires may have been—

Do not over-inflate these tires to save them from quick and excessive wear.

It is not necessary. They are made for true low air pressures.

U.S. Royal Balloons True Low Pressure with the New Flat "LOW-PRESSURE TREAD" and Built of Latex-treated Web Cord
