When Better Automobiles Are Built, Buick Will Build Them

No. 17

Question: Why do all of the great racing cars use Valve-in-Head engines?

Answer: Because this type develops the greatest speed and power. All first place winners of the Indianapolis 500 mile race since 1912 have had Valve-in-Head engines. Buick pioneered the Valve-in-Head engine in 1904 and has used it ever since because it is more powerful, more economical and more dependable.
