deavor to get Henry Ford to buy most of the ships, believing that much of the steel and other material in the vessels can be used in manufacture of automobiles. Ford is also expected to buy some of the better ships from the Government for ordinary trade purposes.

GOVERNOR GENERAL Leonard Wood of the Philippines has set out to raise a million dollars in the United States for the treatment and rehabilitation of inmates of the Filipino leper colony. There are about twelve thousand lepers in the Philippines, and many marvelous cures of the dread disease are reported. The money collected under the direction of General Wood is to be used in building better homes for the lepers and to provide funds for expert technical assistance.

SECRETARY of Agriculture Jardine has embarked on a personal investigation of farming conditions in the Middle West. He will make a six weeks tour of this region, stopping in many places for talks with farmers and stock-raisers and to get their views with respect to what steps should be taken by the federal Government for the further aid of the agricultural industry. Secretary of Commerce Hoover will travel over the same territory a little later, but will give special attention to the drainage and reclamation developments in the mountain states and will combine this with a visit to his home in California.

THE AMUNDSEN airplane flight to the North Pole aroused keen interest in Washington, especially in view of the fact that a similar expedition is to be dispatched by the navy department, but with a giant dirigible instead of a heavier-than-air machine. The Navy's polar flight was planned more than a year ago, but never materialized. At that time only one airship was available, but now the United States has two—the Los Angeles and Shenandoah—either of which may be selected for the trip. The National Geographic Society of Washington is also sending an explorer to the pole in the person of Commander Donald McMillan, who will sail from Boston on June 7th.

POTATO CROP LOOKS GOOD

There is every indication of a large potato crop for Oregon this year, there having been plenty of rainfall in May to give the crops a good stand. Eastern and general Oregon potato counties report splendid prospects and a large yield in the Willamette Valley is fairly well assured.

WILLIAM A. OLDFIELD, Arkansas Congressman and minority whip in the House of Representatives, is slated to succeed Clem C. Shaver of West Virginia as Chairman of the Democratic National Committee. It is understood here that Shaver will step down within the next month and that the election of Oldfield is assured. Oldfield is already Chairman of the Democratic Congressional Campaign Committee, and probably will combine both jobs in the next congressional campaign. Under this leadership the Democrats will make a supreme effort to wrest control of the House from the Republicans. As the democratic party is now broke, Oldfield will also be charged with the responsibility of raising enough money to finance the campaign. Shaver has expressed a desire to continue in the Chairmanship until the debts incurred in the last national election are paid off. This he is now engaged in doing.

PRESIDENT COOLIDGE has been urged by some of his friends to take drastic measures against Americans in Europe, who, for their own glorification, have been advising the French people that the United States has no intention of forcing the payment of the billions of dollars of war debts owed by European nations. The President's attention has been called to an old federal law, enacted in the early days of the Republic, to prohibit American citizens from engaging in any activity with foreign powers which might obstruct the policies of the United States. The penalty is \$5,000 fine and three years in federal prison. The Coolidge Administration is determined to collect foreign debts and much dissatisfaction has been aroused by the attitude of Americans abroad who have set out to hinder the government.
