

Mechanical Excellence

Makes the Star Car the favorite of mill men

Aside from its good looks and reliable performance, the Star car has embodied in its makeup such mechanical superiorities that it commends itself instantly to the man who knows machinery.

We'll demonstrate to you gladly, or we'll take you into our stock room and show you the parts that make this car the sturdiest performer on the market.

EXPORT NEWS

Clark & Wilson Lumber Co., Portland, loaded early in May 500,000 feet of lumber for Buenos Aires and Montevideo on the steamer Hollywood, of Swayne & Hoyt line.

Approximately one million feet of ties are at Kalama port dock, Kalama, Wash., awaiting shipment to England by J. R. Harvey, through Balfour, Guthrie & Co., Portland.

Buffell Lumber & Manufacturing Co., Tacoma, Wash., shipped 5000 doors with western hemlock stiles and rails and Oregon pine panels to the United Kingdom. The doors pleased the trade and repeat orders have been offered.

Peterman Manufacturing Co., Tacoma, Wash., finds a ready market in the United Kingdom for white pine wany hitches. Pine logs suitable for this trade are selected from log rafts, squared up in the mill and sold by string measure.

Portable wooden houses shipped to Greece will be allowed entry free of duty up to December 31, 1925, according to a decree published March 24, 1925, by the Greek government. This decree applies to necessary parts and accessories of the houses as well.

Lumber manufacturers of British Columbia are interested keenly in the new railroad being built by British interest in Peru, which is to extend to the Amazon, a distance of 3000 miles. British oil and tobacco interests have decided to construct this road, and British Columbia sawmills anticipate considerable business in ties, timbers and lumber.

The government of Argentina plans to proceed with the second year's part of a four-year program to develop the state petroleum interests. A total of 156 wells will be sunk in the Comodoro Rivadavia field during 1925. In the Plaza Huincul field several more wells will be bored to determine the value of the field as an oil-producing center. Consul General Henry H. Morgan, Buenos Aires.

The Ecuadorian minister of interior and public works signed recently a contract for the construction of the Quito-Ibarra section of the Quito-Emeraldas railway project and for survey of the line from Ibarra to the port of San Lorenzo. Besides the building of the line itself, the contract covers the construction of stations, machine shops, water tanks, and the furnishing of equipment.—Richard M. DeLambert, secretary at American Legation, Quito.

Prevent Forest Fires

GO FISHING

Barney Deyo and Elmer Whipple of Ewauna mill, took a fishing trip to the north fork of the Sprague river Sunday. The two men made a nice catch of fish and returned to Klamath Falls the same evening.

LAMM'S CAMP

James Bailey made a mysterious trip to Klamath Falls on last Saturday night and one day this week he got a letter in a little pink envelope all powdered and perfumed up. Some report that they think Bailey will soon be traveling that long and rocky road to suicide.

Old Man Badger Brady has finally removed his red shirt, so the sun is shining out nice and warm. The Badger's shirt is so red that it reflects the rays of the sun back up around Crater lake and has almost melted the snow from the rim.

Little Bobbie, son of Mr. and Mrs. W. R. Hyde, had a very severe accident one day this week when Buster Lowe accidentally hit him in the head with an ax, cutting a bad gash in the top of his head. He was taken to Klamath Falls, where he was given medical attention and is doing nicely now.

Dr. Lamb was a camp visitor on Thursday of this week, this being his first trip this season.

Quite a few went fishing from here last Sunday to Diamond lake. All reported a fine catch of trout. Delbert McCoy brought home the prize catch of a four and a half pound trout.

Mrs. J. B. Dodd of Klamath Falls is visiting with Mr. and Mrs. W. L. Clement this week.

W. E. Lamm of Modoc Point, Fred Baker and Mr. Howath of the Klamath Agency, were camp visitors on Thursday afternoon.

Lots of complaint among the cat skimmers now, since it is getting dusty. They say that the dust gets in the kitten's milk.

Frank Shattery had to make a trip to the Falls on Thursday to have a tooth pulled. It might have been to get a tooth washed out.

Superintendent Claude Houghton made his regular trip to the Falls on last Saturday evening, taking with him his sister-in-law, Mrs. Jerry O'Callaghan and children of Kirkford.

Prevent Forest Fires

APPLICANTS FOR BUREAU POSITIONS

A business assistant with a knowledge of the lumber trade is desired to fill a vacancy in the bureau of foreign and domestic commerce of the department of commerce, Washington, D. C. The study of the manufacture, distribution and consumption of lumber and wood products, elimination of lumber wastes, lumber market requirements and practice, and the preparation of bulletins and press articles on the above subjects will be the duties of the position. Applicants must have been graduated from a college or university with major work in business administration, engineering or forestry. At least one year's experience in the commercial lumber trade is also required. This examination can be taken in Seattle, Tacoma, Portland or wherever the civil service has an office.

Klamath Falls Girl Winner of 2nd Prize in Forest Fire Essay

Miss Joyce Bennett of Klamath Falls was winner of the second prize offered for the best forest fire prevention essay offered by the Stop Forest Fires association. Miss Bennett's essay follows:

Forest Fire Prevention
Before learning the effect of forest fires, their prevention, and how they are detected it is necessary to know the location of the forests of Oregon and their value to the state in various ways.

The forests of Oregon are divided into three fairly distinct regions. The are: The forests of the Coast range, the forests of the Cascade range, and the Blue Mountain forests.

Yellow pine is the most important commercial tree of Oregon forests, and comprises a large part of the timber in those forests.

At \$3 each thousand feet, which is about the average, the timber of Eastern Oregon alone is worth over \$82,000,000 on the stump.

Lumber, however, is not the only product of the forests. They are of great value in conserving the water which falls in the form of rain and snow. The ground, generally overlaid with a blanket of decaying mold, forms a reservoir which absorbs large amounts of water. It acts as a blotter, and only after the ground is full of water does this water begin to run off. The water of the streams of Oregon is of untold value in the life of its people.

Also, many people go to the woods for rest and recreation. Camp grounds are established for the use of those people who are too careless or too ignorant to take care of the woods in which they camp. The recreational resources of our forests and mountains can be counted as one of the largest and most important, and it is estimated that over a million people each year enjoy those things offered by the forests.

In furnishing forage for stock our forests play another important part in the economic welfare of the state, as the meat products which come from the stock grazed in the forests help give life and sustenance to thousands of Oregonians. The hay and grain saved in this way can be either used to feed the stock in the winter or may be made into flour.

The box factories and lumbermills of Klamath county depend for support upon the neighboring forests. The workmen in these mills receive for wages the money indirectly issuing from these forests. They in turn pay to the merchants of the town in treasuries for services rendered. This money is received by the state by taxation and used for building of highways and schools, which are necessary to civilization.

Fires first destroy the small trees, brush and litter upon the ground which acts as a fertilizer for growing trees. The fires often burn just the needles and leaves of the big trees, leaving the trunks to rot and fall.

So although the fire has not killed or injured all the big trees from which lumber comes, it has

burned down some of them and the heat and flames have killed others.

The agencies causing fires are classified into two general divisions—those caused by nature and those caused by men.

In the division of nature-caused fires, the most destructive is lightning, which starts from 300 to 500 fires every summer. There is no way by which lightning fires can be prevented. They usually occur in the higher mountains, and the best that can be done is to put out such fires immediately, before they cover any considerable area.

By far the most serious and devastating fires result from man's carelessness and ignorance. Camp fires carelessly built or left unattended spread through dry undergrowth, and in time become forest fires, not only destroying the camping grounds, but also the lumber valuable to the state. Careless hunters and fishermen are responsible for many fires by throwing away either lighted matches, pipe embers, smoldering cigars or cigarettes. These, falling into dry, inflammable pine needles and grass, flare into forest fires when fanned by the wind.

Certain industries of man find it necessary to use fire in the woods. The operation of logging engines, railroad engines, and the clearing of land by ranchers result in many forest fires through lack of care.

From this it may be seen how essential are the forests of the state, and the prevention of forest fires.

The State of Oregon has a number of laws which have penalties of from ten days to three months in jail, with fines of from \$5 to \$500 if the laws are broken. These laws are passed to help reduce the number of fires caused by carelessness.

There will always be some fires in the forest which will be caused by nature from lightning, and perhaps some accidental causes, such as the breaking of power lines.

The losses and damage from all fires except those caused by nature or by accident would be averted if each person of Oregon would adopt as his motto "Help prevent fires," and abide by the following suggested pledge:

1. Matches—I will be sure my matches are out. I will break it in two before throwing it away.
2. Tobacco—I will be sure my pipe ashes, cigar or cigarette stubs are dead before throwing them away. I will not throw them into brush, leaves or needles.
3. Making Camp—I will build a small camp fire. I will scrape away all brush and inflammable material from the spot. I will build it in an open space and not against a tree or log, or near brush.
4. Leaving Camp—I will never leave a camp fire unattended, even for a short time; I will quench it with water or earth.
5. Fighting Fires—If I find a fire I will try to put it out. If I can't, I will get word of it to the nearest United States forest ranger or state fire warden at once. I will keep in touch with the rangers.

Klamath County Sawmill, Planing Mill and Manufacturers' Directory

- Ackley Bros., Klamath Falls.
- Algoma Lumber company, Algoma.
- Anne Creek Lumber company, Fort Klamath.
- Big Lakes Box company, Klamath Falls.

Clothes

Do not make the man

BUT A GOOD SUIT OF CLOTHES MAKES

A MAN FEEL ALMIGHTY GOOD

Mastercraft Suits

give you that well-dressed feeling. They are strictly hand made and the fabrics are all wool.

They fit—They wear—They are dressy.

The Price is \$35.00

J. L. TAYLOR & CO.

MADE-TO-MEASURE SUITS

310 Samples of cloth—guaranteed all wool

24 Styles of Suits.

Every combination of color, style and finish that you could think of.

—I guarantee a perfect fit. You do not pay unless you are satisfied

Prices, \$25.00 to \$70.00

Why buy from peddlers when you can get just as good, if not better, buys from a local merchant. Then you are sure of an adjustment if the suit is not satisfactory.

There are no strings on a peddler but your local merchant is here every day in the year.

We are not here for QUICK MONEY

We want your business EVERY YEAR

THINK IT OVER

NEW RETAIL YARD

George Smith is installing a gas-line driven pony planer as a part of the equipment of the small retail yard that he is establishing in Sprague, the terminus of the O. C. & E. railroad line. The small machine will handle lumber up to twenty inches in width, and will have a capacity of from 10M to 15M.

Smith will purchase the lumber which he will remanufacture and distribute from the Campbell-Towle Lumber company.

Prevent Forest Fires

TO PORTLAND

George Benefield, engineer at the Shasta View Lumber and Box mill, took a trip to Portland last week. His place in the engine room was filled during his absence by George Barnes.
