With fear striving for mastery over their determination, the two girls gathered stones and clubs with which they battled the creature till life was extinct. Then as a trophy of their encounter and as a final warning to other snakes to beware, they severed the rattles, tied the securely in to handkerchief and went happily on their way.

Walk-Over on every shoe

A shoe for men who believe their eyes

Rest your eyes upon this shoe, men

Notice how wide the ordinary heel is at the top. No wonder most shoes gape at the ankle. Now look at the Walk-Over pear-shaped heel. It is extra-wide on that side where your heel is extruded. When your foot settles down into a Walk-Over shoe it can make itself at home. It has room to expand and be comfortable. The pear-shaped heel grips at the sides, without pressure at the back—and it fits. It stays snug as long as you wear the shoe.

ONE look tells you that it is the kind of shoe a gentleman likes to wear. You can believe your eyes, too, for this is a Walk-Over—even better than it looks. The uncopiable pear-shaped heel makes it cling at the heel and top. There is plenty of room at toe and tread. It is made with half-century-old quality—quality that makes Walk-Over shoes walk longer and like it better than any other shoe you ever wore. Stop in here at the Walk-Over store. Your first step in a Walk-Over shoe will tell you more about smart comfort than you've learned in a lifetime of wearing shoes without the fit, comfort and good looks that are stamped into every shoe with the Walk-Over trade-mark.

The Walk-Over Main Spring Arch gives rest to your feet while you are walking. It is made of hand-tanned steel supported at three points, and the two forward points rest on rubber. It weighs only a fraction of an ounce. The normal foot does not know it is there, but when your foot needs support, or is tired from overuse, the Main Spring Arch adds unobtrusive comfort.

TROUSERS MAY GROW FULLER AS SKIRTS BECOME SHORTER

LONDON, (AP)—There has been much speculation among local tailors and male members of the smart set whether royalty would take up the "elephant leg" trousers which have proved very popular this spring at Oxford.

There was quite a suggestion of flowing fullness in a blue-grey suit worn by the Duke of York when he

opened the Wembley Exhibition Garden Club recently, which caused no end of comment. The duke's trousers were just full enough to swing a little as he walked.

Reports that "bag" or "blומר" trousers, as introduced by the university students, are to be worn this summer has been welcome news to the cloth trade at Bradford, which has been in the doldrums since short skirts for young women became the rage.
