

# Many Dead and Injured When Big Earthquake Rocks Santa Barbara

(Continued from page 1)

celebrant priest, although two images above the altar fell down near him, turned and urged his worshippers to pray, and it was only his calming of them that saved their lives. For a few moments later the two towers and a section of the front of the mission fell to the sidewalk.

The worshippers then walked out over the ruins. Rescue parties were organized and under the direction of peace officers and civilian leaders, with the aid of naval reserves, a cordon of armed men was placed around the ruined area and visitors permitted within only by credential.

There were no fires resulting from the debris. The food situation was reported satisfactory. The Daily News and Morning Press set up extra one-page editions by hand for distribution throughout the city.

Earthquakes continue to jolt the ruined buildings as disaster.

the correspondent of the Associated Press writes of the Throughout the residences the inhabitants in many cases have moved some of their possessions out on the lawns and amidst the debris of fallen chimneys and twisted houses, smile at passersby.

**SANTA BARBARA, Calif., June 29.—Four Persons are known to have been killed and from 100 to 300 were injured in the earthquake that shook this city at 6:45 a. m. this morning, damaging practically all structures in the city and wrecking several of the largest buildings.**

The San Marcos building, the largest business structure in the city, completely collapsed along one third of its length. The Arlington hotel and the St. Francis hospital were partially destroyed.

One of the four known dead, a Mrs. Perkins, wife of a wealthy railroad man, was killed in the collapse of a wing of the hotel.

The other three persons killed were found in the wreckage of business buildings on State street.

**SAN FRANCISCO, June 29, (P)—** Santa Barbara, the picturesque little city perched high above the ocean in southern California, suffered disaster, the extent of which had not been determined late this morning in an earthquake which was general over southern California shortly before 7:00 a. m., but practically struck lightly in other towns.

6:45 o'clock this morning. No damage was reported.

**SANTA ANA, Calif., June 29.—** (P)—Dishes rattled, windows shook, chandeliers swung and some clocks stopped at 6:44 o'clock this morning when a series of earth tremors shook this locality. No serious damage has been reported.

**HELENA, Mont., June 29.—** Residents of the Gallatin valley, the apparent center of the earthquake which shook four states Saturday night and yesterday fastidiously remained out in the wide open spaces today, looking back at about \$500,000 worth of ruins—the aggregate cost of the temblor.

It was a whimsical earthquake. No one was killed. Nearly a score of buildings cracked and fell. There were a half dozen landslides. A crevice extending at irregular intervals from Manhattan to Three Forks, a distance of 10 miles, remains as one of the scars caused by the quake. The Lombard tunnel of the Chicago, Milwaukee & St. Paul railroad, suffered a cave-in and an avalanche near Deer Lodge covered 500 feet of railroad track nearby, leaving it buried under earth and rocks 100 feet deep. This was caused when a cliff, 800 feet high, toppled and fell.

Railroad officials announced last night that a force of 2000 laborers would be put to work clearing the tracks and the tunnel. The three trains which were hemmed in Saturday night, by the avalanches, were released today. The Milwaukee railroad's Chicago-Seattle flier, the Olympian, was able to go on its way last night under a re-routing arrangement. Another train was moved and passengers on a third train were transferred to other coaches and moved.

**SAN PEDRO, Calif., June 29.—** (P)—Two earth tremors of moderate intensity were felt here today between 6:35 and 6:40 a. m. Each of the shocks lasted from 10 to 20 seconds. Windows rattled and in some instances china was toppled from shelves but no major damage was done.

**ALHAMBRA, Calif., June 29.—** (P)—A slight earthquake shock lasting 30 seconds was felt here at

Great Falls, Billings, Livingston, Missoula, Helena and other cities and towns were thrown into a near panic and rushed clear of buildings. The shocks continued intermittently until well after 10 o'clock. Yesterday there were slight recurrences at Three Forks, White Sulphur Springs and Anaconda.

Three Forks, Manhattan and Logan, all near the junction of the Madison, Gallatin and Jefferson Rivers, which form the source of the Missouri, sustained the greatest loss. The court house at White Sulphur Springs fell and several smaller structures were demolished. The loss there will exceed \$100,000, it is said, and Three Forks, where the damage was greater, lost about \$200,000, reports say. Three Forks residents counted 41 distinct shocks, they reported.

Jefferson river, a short distance above the convergence point, was lowered two feet by the quakes. Hundreds of men were working in the mines at Butte and Anaconda as the earth's surface trembled, but in the 1000 miles of underground workings there was no damage, according to Butte reports. The miners flocked to the surface when they felt the shocks.

**LOS ANGELES, Calif., June 29.—** (P)—A severe earthquake shock rocked Los Angeles at 6:43 o'clock this morning.

Downtown buildings swayed considerably, but the movement was slow and even and there were no indications of damage, although the motion continued for more than a minute.

The earthquake continued at intervals but all were the slow, steady, yet extremely severe movements. The tremors were felt as far north as Newhall, some 31 miles from here, according to telephone company reports.

The tremors were continuing at 6:56 o'clock.

Bakersfield, Oxnard and Santa Barbara to the north and Colton to the east all reported to the Southern Pacific train dispatcher here that they felt the tremors. No reports of damage came into the Southern Pacific office here.

The earthquakes were felt in an unusual degree of severity at Mojave and Lancaster, Antelope valley, a hundred miles north of here, according to operators of the Los Angeles bureau of power and light system.

The center of disturbances seemed to be in Los Angeles and to the north, preliminary telephone and telegraph reports indicated. Ventura reported that the movement was severe there. Clocks were stopped by the tremors in Los Angeles.

El Centro reported that the tremors were not felt in the imperial valley.

Western Union and Pacific Telegraph and Telephone wires out of Ventura in the direction of Santa Barbara went dead in the earthquake and an hour later the companies reported they were not able to establish communications with Santa Barbara.

### Another Quake

**SAN JOSE, Calif., June 29.—** (P)—A second earthquake shock, less severe than the one which worked havoc in Santa Barbara early today, was recorded by instruments at Santa Clara college at 10(P)45 a. m. today, it was reported by Father J. S. Ricard, head of the physics department at the college. The first shock at 6:45 this morning was the most severe recorded at the college since 1911, Father Ricard said.

**ESTABLISH COMMUNICATION**  
**SAN FRANCISCO, June 29, (P)—** Direct telephone communication with Santa Barbara was established by the Associated Press late this morning through Los Angeles, and later from San Francisco.

First reports over the re-established wires showed casualties not so large as at first rumored.

### TUG TO RESCUE

**WILMINGTON, Cal., June 29, (P)—** The salvage tug Peacock of the Merrett, Kapman and Scott, salvaging firm here was ordered to proceed to Santa Barbara with all haste to lend assistance in rescue work and establishment of communication through its wireless, it was announced today by company officials.

### TRACKS DESTROYED

**SAN FRANCISCO, June 29, (P)—** The Southern Pacific company reported here that but eight miles of its tracks were affected by the Santa Barbara earthquake. Trains can reach Santa Barbara from Los Angeles, while southbound trains can go as far as Goleta, eight miles from that city. Traffic is being routed by way of the San Joaquin Valley and the company reports all trains are going through on time.

**SAN FRANCISCO, June 29.—** The American Red Cross headquarters here are negotiating for all available army airplanes here to rush a fully equipped relief force

to Santa Barbara. One of those who will go from here is J. W. Richardson, who headed the Red Cross in the relief in the tornado stricken towns of the middle west.

The Pacific Telephone and Telegraph company has received a message from its manager at Santa Barbara. The manager states that no fires have broken out but that brick buildings have either been demolished or badly damaged along State street. The telephone exchange was not destroyed but badly shaken, necessitating th walls being propped up.

## Ten Youths Of Klamath County At Camp Lewis

Klamath county is represented at this year's Citizen's Military Training camp at Camp Lewis by the following citizens who will devote one month toward acquiring a knowledge of the military art:

Lucien B. Applegate, Stuart R. Balsiger, Herbert M. Dennis, Kenton D. Hamaker, John L. Hawkins, Omar F. Hospins, Raphael V. Morgan, Frank M. Upp Jr., Merrill; Vernon A. Coverstone, William A. Hulet.

Seven hundred student soldiers from Oregon, Washington and Northern Idaho are being trained at this camp. Courses are given in Infantry, Field Artillery, Cavalry, Engineers and Signal Corps. Students with no previous military training are being instructed in the basic course. Others who have attended previous camps or have had military experience are receiving instructions in the Red, White or Blue courses, depending upon their proficiency. Graduates of the Blue course are eligible for commissions as Reserve Officers.

The camp is commanded by Col.
