## Plenty of Windows Make This Home Bright and Airy

House No. 513

Designed for American Face Brick Association

**S**IMPLE and effective, with a straightforward rectangular plan, this bungalow of the Western type is a very economical one to build. The use of an attractive face brick laid in some distinctive bond and mortar joint would greatly enhance the attractiveness of this design.

It would look exceedingly well with wide, deeply-raked horizontal joints, and very thin vertical joints. The effect would be a series of horizontal shadow lines banding the entire building.

Note especially the number and grouping of the windows, which besides giving an abundance of light and air in every room, are well placed with reference to the furniture.

The porch extends the full width of the house but the roof does not, thereby affording plenty of light for the living room.

The spacious living room with its wide fireplace at one end has plenty of wall space for furniture and a good coat closet convenient

in the entrance. A pair of French doors open into the well lighted dining room which is large enough for all occasions. The bedrooms with good closets are well isolated and have plenty of light and ventilation.

The kitchen is but a few short steps from the dining room, a feature appreciated by those who do their own work. As there is no pantry in this plan, the kitchen is provided with a large cupboard and has room for a kitchen cabinet. The sink and range are convenient to each other and well lighted by two windows.

The enclosed rear porch contains the stairs with an entrance at grade and accommodates the ice box, thus keeping the iceman out of the kitchen.

A well-ventilated attic, valuable as storage space, may be reached by a disappearing stairway in the hall ceiling. The basement is well lighted on the two sides and rear, and includes a laundry with large drying space, fruit and vegetable cellar, fuel bin and heating plant.

## Fighting Game Expected With Weed Tomorrow

### Special Cops and Neutral Umps on Hand

Special policemen, neutral umpires and a large abundance of pop bottles and cushions, await the opening of what promises to be the bitterest and most hard fought game of the season, tomorrow afternoon at the Fair grounds field between Klamath Falls and Weed.

Klamath baseball fans are worked up to a high pitch over the game, for the Pelicans and Weed stand tied for second place. Not only that, but there is a grudge between the two teams that will be fought out on the baseball diamond, and maybe off also, tomorrow afternoon.

Whether or not the Weed team is annoyed at Manager Glover's insistence that the Weed umpire, Renton, be not allowed to officiate tomorrow afternoon, is not known. But the fact that Glover did insist that Renton remain off the field in official capacity and that neutral umpires be substituted, is not likely to enhance the somewhat strained relations between the two clubs.

"Last week, they had a free-for-all at Yreka when Weed played, and inasmuch as this is even a hotter game, I am taking the precautions of having special policemen," Manager Glover said today. "I freely predict a few fights on the field following the game."

"We are tied with Weed, and the boys are all keyed up for the game that might prove to be the turning point of the season. We will do our best and play a clean game as long as Weed does. When they don't, we will beat them at their own game."

The two neutral umpires will be Wright of Hornbrook and Hatch of Sisson.

Mohler has been selected to pitch for the Pelicans while DeMitt will receive.

The line-up is as follows: Northwest, short stop; Watts, second base; Noel, center field; Arnold, first base; Booth, right field; Mathews, left field; Bayness, third base; DeMitt, catcher; and Mohler, pitcher.

A special train will bring several carloads of Weed rooters to Klamath Falls and they will occupy a section in the grand stand and cheer their home team to the echo.

## Polo Ponies Will Be Trained Here

### Fernando Michel, Expert, Expects to Take up Work Here Shortly

Fernando Michel, the polo pony expert who has been here for the past week, left for his home in Los Angeles yesterday. Before leaving Mr. Michel stated that he believes this county offers splendid opportunities for the raising of high grade polo ponies, and it is his intention to embark on the proposition at an early date.

"Climate and forage conditions are ideal. I examined the bunch of horses owned by J. Frank Adams and find in it many that I believe can be used to advantage in the polo game. If I can reach a satisfactory price agreement with Mr. Adams, I will buy all the horses he has. I am now going back to Los Angeles and within a short time I expect to return and actively enter into the raising of polo ponies."

Interest in polo is gaining throughout the United States. Recently the west played the east, with the result that the latter was overwhelmingly defeated. The success of the western team was due to the character of the horses used and the method of training. The result was an immediate demand for western polo ponies and it is to meet this demand that Mr. Michel has been scouting around for an ideal spot in which to raise and train them. His selection of Klamath county is the result of his investigations.

The statement attributed to Hartig are not denied by him as being made during the divorce affair. Leland filed similar suit against another church official also on the committee.

## GETS BIG VERDICT IN SLANDER SUIT

CHICAGO, July 18.—Damages of \$10,000 were awarded by a jury last night to Albert Leland, who asked \$50,000 in a slander suit against E. L. Hartig, trustee of the Oak Park church to which Leland formerly belonged.

Leland charged that Hartig had referred to him as the father of an illegitimate child, a rubber in a Turkish bath, guilty of fraud, and a medical practitioner without a license.

The suit was an aftermath of Leland's divorce suit in which the Rev. Carl D. Case was accused of misconduct by Leland's wife. The latter testified for her husband in the divorce suit.

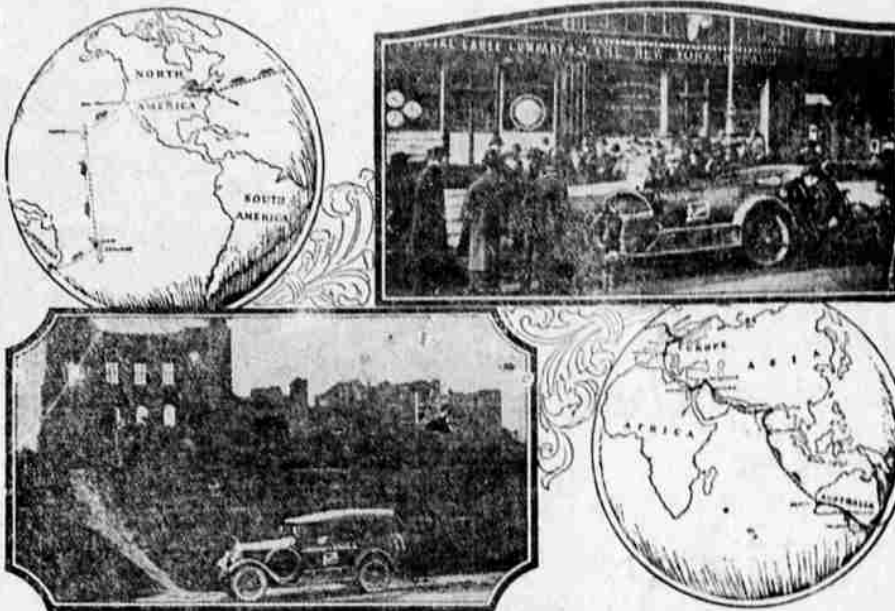

Dr. Case intervened to clear his name and was given a vote of confidence by his parishioners. The divorce was granted by the appellate court and appealed by Dr. Case to the supreme court, where it is now pending.

The statement attributed to Hartig are not denied by him as being made during the divorce affair. Leland filed similar suit against another church official also on the committee.

## Buick Loops Globe in Record Run

The above illustration shows the route taken by the "round the world" Buick. The lower left photograph shows Kenneth Carie Warwick, England, in the background; the photo at the upper right shows the globe driver in front of the Paris office of the New York Herald. The car is being driven by dealer representatives. It will have had 350 different drivers when it completes its world tour in New York.

A Buick car, which departed unaccompanied by mechanics or special drivers. When it returns to New York City the machine will have been handled by approximately 350 different drivers.

The last difficult leg of the trip has been completed, a long run over the questionable roads across the continent of Australia. The car is now en route to New Zealand and Honolulu, from whence it will be shipped to San Francisco and driven across the United States through Detroit and Flint to New York.

The trip around the world was conceived to demonstrate that a Buick will travel to the remote corners of the earth and that on such a journey it is always safeguarded by service facilities.

The globe-encircling car has made its trip without faltering. Driven from dealer to dealer by dealers' representatives only, it has demonstrated Buick's ability to withstand the "man-handling" of hundreds of drivers of various nationalities and degrees of skill.

After coming from the regular assembly line in the factory at Flint, Mich., it was equipped with four spare tires and a shovel. Supplementary tanks on the running boards provide oil, gasoline and water for the long runs over deserts and other uninhabited regions.

After being boxed and sent to New York City it was shipped across the Atlantic to Liverpool, where its land journey started on December 31, 1924. The car was passed from dealer to dealer en route to London.

It then was shipped from London to Amsterdam. With frequent changes of drivers it passed south through Europe, visiting Brussels and Paris and finally reaching the Mediterranean at Marseilles, France.

On January 20, it was placed on a steamer bound for Port Said, Egypt. From there it was driven south to Cairo. Then the route swung "east of Suez," where the real test began. Through Palestine and the biblical country, the car proceeded to Beirut.

On February 5, it left there for Damascus and Baghdad, accompanying one of the desert convoys of the Saini Transport Company, which incidentally uses Buicks in its desert fleet.

The Syrian desert was crossed without difficulty. The Buick distributor in Beirut, however, gives some idea of the country traversed, in the following letter excerpt:

"The road was terrible in places being nothing more than a car track strewn with large boulders in the run over the Lebanon Mountains the car climbed to a height of more than a mile. After spending the night at Damascus, the 340 mile run to Baghdad was made at an average speed of 25 miles an hour."

The Mesopotamian distributor took the Buick at Baghdad and drove it to Basra on the Persian Gulf from whence it was sent to Bombay, India. From there it was driven over different trail-roads across India to Agra, and finally Calcutta.

If they went to Ceylon, where the Buick distributors drove it for three days before sending it to Perth, on the southwest coast of Australia where it arrived April 1. The desert waste of southern Australia between Perth and Adelaide was regarded as the most difficult part of the trip. This distance is something more than halfway across the United States. This long stretch of bad going was negotiated successfully as was the shorter journey from Adelaide to Melbourne, near the southeast end of the continent. The car since was driven to Albany and then to Sydney, from which point it was shipped to New Zealand.

After completion of the globe journey it is planned to preserve the car as an object of historical interest.

## Extensions Work Will Serve 1000 New Subscribers

Equipment to serve one thousand additional subscribers will be installed by the telephone company, when the last of the \$30,000 dollar extension work is completed the middle of August.

To date underground cables have been laid on Klamath avenue, and overhead cables on Spring street, East Main street, South Sixth street and out to a point near Pelican City.

In all there will be 34,000 feet of new cable strung when the job is completed.

Work on the extension project started April 1. The telephone company was prompted to make the extension because Klamath Falls has shown the largest percentage increase in telephone subscribers of any other town in the state.

## BIRTHS

DAW—July 17, at the home of Mrs. Byrd Tompkins, to Mr. and Mrs. Lorance Daw, of Kirk, a seven and a half pound son, named Lorance Charles Jr.

## Do You Need Money to build that home

If you own your lot, and have some money, we can loan you half the value of building and lot combined, payable like rent. Monthly payments. Make your arrangements now, before the spring rush begins, so that your dream home may be a reality before snow flies again.

There is no quicker way of making money than by real estate investment in a growing town. You are in the growing town—the rest is up to you.

## Who Will Own Land, Question of Power Co.

### Argument Heard Over Complaint in Damage Suit

In event the Fort Klamath Meadows company does secure damages for alleged injury to land, what becomes of the land after the termination of the suit? Does it become the property of the California Oregon Power company or does it continue to be the property of the Fort Klamath Meadows company?

This, in substance, is the question asked by attorneys for the power company in an argument before Circuit Judge Leavitt yesterday, when the power company asked that the complaint alleging half million dollar damages done to the land of the Fort Klamath Meadows by the power company, be made more specific.

Herman Phleger in his oral argument, stated that the complaint of the Fort Klamath Meadows company, left an open question as to the disposition of the land in event that damages should be secured.

In fifteen days, a brief setting forth the contention of the power company, will be submitted to Judge Leavitt. Within ten days thereafter, the Fort Klamath Meadows company will file a reply to the brief and five days after the filing, the power company will file an answer to the reply.

By August 15 all written arguments on the question will be in the hands of the court.

## Prineville Named For 1926 Meeting Of State Editors

GRANTS PASS, Ore., July 18.—(AP)—Oregon State Editorial association in annual convention today refused to take a stand on the evolution question. It tabled two resolutions, one of which declared against passage of any law restrict-

ing either religion or education, and another deploring tendency to create from evolution discussion a political issue. The first resolution was proposed by Professor C. J. McIntosh of the Oregon Agricultural college and declared the editorial association was opposed to any movement to introduce the Tennessee evolution fight into Oregon.

The second resolution was proposed by A. E. Koen of Oregon City, who asserted he had been informed that a movement was on foot to make the evolution question a political issue.

A. L. Mallory of the Oakland, Ore. Tribune, was elected president of the association and H. E. Hoss, Oregon City, secretary-treasurer.

Executive committee: Joe D. Thomson, Hood River, vice president for Central Oregon; Earl E. Richardson, Dallas, vice president Willamette valley; A. E. Voorhes, Grants Pass, vice president southern Oregon; George Aiken, Ontario.

vice president eastern Oregon; Edgar McDaniel, North Bend, vice president of western Oregon.

Prineville was chosen for the next convention.

Resolutions urging enactment by congress of legislation forbidding postoffice department from continuing in commercial printing business in competition with citizens, and approving the program adopted by the Pacific Coast Editorial conference were approved.

A resolution was adopted condemning high pressure methods of soliciting advertising patronage and advocating that "advertising worthy of the publication be the first consideration in all solicitation."

Hens just loaf around so much we wish we could teach them to lay the dust.

We usually criticize others for doing exactly what we would do in their places.
