There is much dissatisfaction among the school patrons and citizens of Chiloquin at the slowness of the much needed addition to the public school being built. With the next school term only forty days distant, no work whatever has been started on the grounds. Last year the school was so congested that neither teacher or pupils could do their best work, and it is to be hoped this condition will be alleviated at once. It is quite likely that enrollment this year will double last years.

Fault Under River Blamed For Quake

TOKYO.—A scientific opinion on the recent earthquake in the Tajima region of Japan, which took several hundred lives, has been submitted to Governor Hiratsuka of Hyogo-ken by Dr. Nakamura of the Tokyo Imperial university, the leading sismologist of the empire. In his report Dr. Nakamura stated:

"The existence of an earthquake belt running from Aomori in the northeast to the neighborhood of Sabae town, in Fukui prefecture on the Japan sea coast, has been well known, but in this zone no strong shock has ever been recorded. On the south-western Japan sea coast, including Inaba, Hoki, Idumo, Iwami and Oki provinces, also no disturbance of importance has taken place since the establishment of Tokyo university.

"I am inclined to attribute the origin of the recent destructive quake to a deep fault below the mouth of the Maruyama river, as mentioned by others who have inspected the Tajima region. There might have been a local dislocation of strata near Kumihama, in Western Tango province, and any

immediate destructive shock is hardly conceivable in the vicinity of the river mouth mentioned. Anyhow, a sounding of the sea bottom near the river mouth might furnish valuable data."

RUMANIA EXPECTS WHEAT SURPLUS BUCHAREST.—(AP)—A decrease of 5,000,000 acres of grain sown land in Roumania in the present year is shown by the government statistics issued. Despite the de-

creased sowing, the crop conditions are reported as excellent, the weather throughout May having been exceptionally favorable.

Agricultural experts are predicting that the 1925 wheat crop will leave a large exportable surplus.
