

The motor makes the car

The Willys-Knight Has the Motor

This car which uses the world famous sleeve valve motor has an enviable reputation for luxury, long life and low upkeep. Eighty-five per cent of the foreign cars are using this style of motor at the present time. This would be true in our own country if not for the fact that the exclusive patent rights are owned by the Willys-Overland Co. If you are not familiar with this engine come in and let us explain it along with hundreds of other good features which the Willys-Knight possesses. Below are a few of the many recommendations given this wonderful car.

Why not own one?

Big Praise by Big Men

GLENN CURTISS

LEE DE FOREST

Airplane Builder
Said Glenn Curtiss, after a ride in a Willys-Knight Sedan equipped with the Lanchester Balancer—"It is surprising. I drove the car at all speeds and found absolutely no vibration."

Famous Radio Inventor
"The efficiency of the Lanchester Balancer installed on the Willys-Knight is simply astonishing. I have never ridden in a car with a quieter, smoother running engine."

Streets, return last evening from an outing at Diamond Lake, bringing back a large mess of good sized trout.

Demand

IN the early days of the telephone, when the 16-mile circuit from Boston to Salem was the longest in existence, an old lady visited the Boston exchange and asked for a connection to Chicago so she could talk with her son.
The need for voicing thought to far-away places began with the nation's expanding activities. Long before the telephone art permitted it, long distance service was demanded. A national service was, from the beginning, the beacon of the telephone's founders, and the inspiration of the scientists and engineers whose achievements gradually overcame the obstacles to the transmission of human speech.
These conquered, national expansion has more and more been made possible, and the uncertainties of separation have diminished. Today any community in America can talk with any other so promptly and satisfactorily that men have difficulty in imagining a time when universal service was an ideal yet to be reached.
