Walk-Over on every shoe.

Is this shoe yours — or your neighbor's?

YOUR foot is as different from your neighbor's as your nose is. Even when you and your neighbor wear the same size shoe, can it really fit you both, when your feet are so different?

You get more than style and comfort in Walk-Over — you get the pear-shaped heel. That is an exclusive Walk-Over feature that makes shoes fit better. See in these diagrams how shoe heels are made. The ordinary heel is so narrow at the bottom that there is no room for your heel to expand. It is no wonder that pressure from your weight makes ordinary shoes gape at the top.

The pear-shaped heel has room at the bottom for your heel to expand, and it clings at the top. It makes fine-fitting, good-looking Walk-Over shoes fit better, feel better and look better.
