New ease of routine care—
New life for the car itself

THE PACKARD SIX today offers improvements of the utmost importance to owners.

The Packard motor oil rectifier and the chassis lubricator free Packard Six owners from the inconvenience and the drudgery of routine care.

More important still, their use doubles the mileage life of the car.

The rectifier constantly distills the crankcase oil as the motor runs, keeping it pure and undiluted. The chassis lubricator delivers oil to 45 chassis points at the pull of a plunger on the dash.

These improvements, found together only on Packard cars, mean much to Packard Six owners.

Packard Six enclosed cars have been lowered in price by an average of 75%.
