The Good-Night Kiss

Mother, dear, kiss me good night;
Do not go away.
When my eyes are shut all tight
Near my bed please stay.

Mother, one more story please;
Tell me 'bout the sand
Falling into children's eyes,
But, mother, don't let go my hand.

Mother, dear, I love you so,
Give me one kiss more.
I'll stop talking, mother, dear!
Please don't close my door.

—Elsie-Jean.

MIDDLE September sees the exodus of that exceedingly important part of the city's devotees, the college boys and girls.

In a world of all changing fashion and furbelows it is amazing to feel how little human nature varies. The human figure alters a bit to accommodate itself to the prevailing mode. Our waists go up or down. Our backs are straight or drooping. Our arms and necks become used to feeling warm with no covering, or cool with a good deal of it. Our feet shuffle in tight skirts or our legs prance emancipated, in short ones. Our heads, which we might have mentioned first, but forgot, are bundles of hair or cropped till they resemble a chrysanthemum blossom shaking in the wind. But our souls remain very much the same.

After all we are no more vain than our grandmothers, really and our brother's friends admire us a less than their brothers' friends did them.

Each generation changes its manners a little, with a tendency to drop the forms and ceremonies of the last more than the last approves. Perhaps one may say, even that in the bubbling up to the top, the social top of a younger set that is unfortunately without tradition, the forms and ceremonies have been too much abandoned. But our hearts are where they always were. We play the oldest game on earth just as happily as it was ever played. The light that lies in woman's eyes has not dimmed.

Intercourse among the young may be less trammelled, but whether boys and girls flirt like gods and goddesses pursuing and pursued in the leafy seclusion of moon lighted alleys, or tumble about like young puppies on the sunny seasons, nature is not abandoning any of her ancient methods for new ones. What does she care whether we guess that youth has just plighted its troth because we see Orlando kiss Rosalind's hand under the moving green roof of forest trees, or because we watch Croesus, Jr., in a millionaires ocean paradise, take Miss Midas by the ankles and throw her off a raft. Both call our attention to the fact that the two "understand each other". Distinction of behavior belongs to the first, and boisterous good fellowship to the last, but the eternal result is the same. They marry. Perhaps, however, it would be well to call attention to the danger of dropping too much mystery in the playing of the great game.

To warn little ladies that a shoulder can be more detectable seen through a mist of gauze, and ankle moving in a cloud of lace, an eye glancing through downcast lashes, a soul holding itself a little crispy aloof, a heart no less honestly in love for being worn in a more romantic place than on the sleeve.

We have heard where the young man's fancy turns in the spring-time and we think the charm that holds longest is the charm that hides the obvious and keeps a little soft screen of guesswork about person and personality. It is not well to be too well known. Barriers are easy to break and most difficult to build up again.

TO STUDY ART AND MUSIC IN CALIFORNIA THIS WINTER
