

THE LUMBERERLOGUE

VOL. I.

KLAMATH FALLS, OREGON, WEDNESDAY, OCTOBER 28, 1925

Number 34

BIG LAKES TO RUN ALL WINTER

CALIFORNIA MAN SAYS REACTION HAS SET IN AGAINST FIBER BOXES

Large California Packers Have Returned to Use of Wooden Boxes; Mills to Operate Through Winter With Minimum Shutdown

"There is a very marked reaction against the fiber container by the more important manufacturers using boxes for shipping their product," according to H. F. Aldrich, a representative of the California Saw Works, San Francisco, who is here on business. Between six and eight months ago many of the larger consumers of box shook switched to the fiber container, but after trying the paper box for several months they are again returning to the use of wooden containers.

Among the large packers who have returned to the use of wooden containers for their entire product are the Dal Monte company, the California Fruit Packers, the San Jose canneries, and plants located in the San Joaquin valley. Many others are still using the fiber, but it is thought that more and more of them will return to the wooden box for its greater strength and reliability.

The pine mills and box factories of California are all cutting, most of them two shifts, and with orders booked in advance. The greater portion of them plan to run all winter, with only the briefest possible holiday shutdown for repairs.

Two new mills are in course of construction in the Sacramento valley, one of them being located at Oroville, the other at Marysville.

Young Logger Takes Bride; To Live Here

George Bushman, formerly top leader for the Pelican Bay Lumber company at camp 2, surprised his friends by arriving in Klamath Falls yesterday with his bride, formerly Miss June Cantu of Centralia, Wash. Bushman left Klamath Falls some ten days ago and went to Centralia where the couple were married at the home of the bride's parents. Since then the couple have been on their honeymoon, visiting Portland, Seattle and other cities in Oregon and Washington.

Mr. and Mrs. Bushman will make their home in Klamath Falls this winter, but may return in the spring to New York City, Mr. Bushman's home.

Frank Hall Used to Play on Paul Bunyan's Eleven

According to reliable reports, Frank Hall, Klamath high school football star, learned his stuff from the well known logger, Mr. Bunyan. Paul started the boy easily as first, showing him how to practise place kicking with sugar pine butt logs, but in no time he was going strong and scoured up so much good timber that Paul had to let him use rocks and boulders for practice.

Frank says Paul was a great coach but he didn't care for the training fare of Blue Ox meat.

DAGGETT LEAVES
C. H. Daggett, general manager of the Ewauna Box company, left yesterday for San Francisco where he will be for some time on business.

NEW EDGERMAN
C. C. Smith, known as "Oley" is now edging for the Shasta View Lumber and Box company. Smith was formerly with the Chiloquin Lumber company.

Algoma Kilns Operating; Do Splendid Work

Kiln System Designed By Matt Egan, Manager of Company

Steam was turned on in the ten kilns of the Algoma Lumber company last week. The kilns, made by the North Coast Dry Kiln company, are of the internal fan type, and according to the company, are doing remarkably fine work. The unstacker and cooling shed are finished and the entire kiln system is working smoothly. The entire system was designed by Manager Matt Egan, as was also a specially built curtain pole machine in the new scrap mill.

EWAUNA'S FUEL SCHEME PROVES GREAT SUCCESS

Planer Shavings and Sawdust Mixture Burns Very Well

POND TO BE HEATED
Oil to be Removed from Exhaust Steam; Condensation used in Boilers

The Ewauna Box company is mixing planer shavings with the green sawdust from the sawmill for fuel, and the mixture burns very well, according to Superintendent Will Sandham. The shavings from the planing mill are blown into the sawdust conveyor from the mill in the fuel house.

Construction will start at once upon three pipe lines from the heater in the boiler room to the pond, where heaters will be installed to keep the water open for all winter operation. When the weather is not sufficiently cold to demand the use of the steam in the pond, it will be condensed and used in the boilers after the oil has been separated from it. The oil that is recovered is admirably suited for use on slow moving bearings, and the condensation will furnish enough water for two boilers.

Lumber Alleys Are Paved By Lamm Company

3600 Feet Being Laid By Warren Construction Company

The Warren Construction company is putting in 3600 feet of paving in the yard of the Lamm Lumber company. Four 600 foot alleys are being constructed and 1200 feet of main alley.

The Lamm Lumber company is the first local concern to pave its lumber alleys. More paving will be put in as the present wooden track-age wears out, many of them being in excellent condition at the present time.

NEW STENOGRAPHER
Mrs. Burnell has accepted a position as stenographer for the Ewauna Box company.

A divorce duo to cross word puzzles has been granted in America. The report does not say who was granted custody of the dictionary.

HILL LINES TO EXTEND TOWARD COOS DISTRICT

Great Northern Plans State Wide Development if Allowed to Build

IS NOT A SUBSTITUTE

Oregon Electric Line to Extend Through Santian Territory to Bay

MARSHFIELD.—If the interstate commerce commission gives the Northern lines permission to build from Bend to Klamath Falls, a state-wide development program, that will include a railroad from Eugene to Coos bay, is planned by the Great Northern, according to authoritative information obtained here today.

Application by the Hill lines to build from Bend to Klamath Falls was made at the recent interstate commerce commission hearing in Portland and this application was made as "opening wedge" by the Great Northern to enter into territory in which the Southern Pacific now has a monopoly.

S. P. Spurns Joint Line
If this application is denied the development program that has been tentatively prepared by the Great Northern will be abandoned, it is understood.

Yesterday Ralph Budd, president of the Great Northern, declared in Portland that application of the Hill lines to carry out the Klamath Falls-Bend project was made after the Southern Pacific had spurned a common user proposal on the Natron cut-off.

If the tentative program of development by the Great Northern materializes it will mean that the Oregon Electric, a part of the Hill lines, will be extended into the Santian territory to Coos bay, thus creating competition in this section and affording a shorter route for short hauls and passengers to Eugene.

Not East-West Substitute
The Hill lines' entry into this territory, however, is not regarded as in any way a substitute for the proposed east-west railroad through central Oregon to the east as hauls would be virtually the same in distance as over the Southern Pacific.

The desire of the Hill lines to enter this territory does indicate, however, that this section of the state is recognized as being a source of tremendous wealth and capable of furnishing freight for more than a single line such as now exists.

Representative of Toledo Firm Visits Klamath

Emery Heron, representative of the C. D. Johnson Lumber company, was in Klamath Falls Friday and Saturday in the interests of his company. The C. D. Johnson company, with sales offices in Portland, has a large spruce operation at Toledo, Oregon.

CONTRACTOR SUES LOGGER

SEATTLE.—Alleging breach of contract by which he was to haul 6,000,000 feet of lumber for the defendant, Eric A. Barnard yesterday filed a damage suit in superior court in the sum of \$6,600 against Ralph R. Wheaton, president of the Wheaton Logging company. The plaintiff alleges that he contracted this year to haul lumber from the Wheaton camp, near Prairie, Skagit county, but that Wheaton later let the work to others.

2 New Camps Are Opened By Firm Here

Shasta View Operation To Run All Winter

Two new camps, one of which is expected to run all winter, have been opened by the Shasta View Lumber company. One of the camps is at Pine Island, near Grass Lake, the other near Kirkford. The Pine Island camp will run all winter. The Shasta View Lumber company purchased much of its logs from contractors during the past season and next year intends to cut out several tracts of timber which it owns.

NINE BROS. TO RUN TWO SHIFTS TILL CHRISTMAS

Firm Contemplates Cut of Twelve Million Feet for Season

YARD IS ENLARGED
Night Shift to be Resumed at End of Week With New Sawyer

The Shasta View Lumber and Box company will make a cut of twelve million feet this year, according to announcement made by company officials yesterday.

The night shift is not running this week, but will be resumed again Monday. For the past few days Sawyer Fred Kleinager has been sawing two shifts a day, but J. A. Anderson, recently scaler for the Chiloquin Lumber company, will take the night shift Monday. Anderson is a newcomer in Klamath county, but has sawed for many of the best mills in California. Before coming here he sawed on the third shift in Brooks-Scanlon Mill B.

Both shifts will operate until Christmas time if the weather permits. Steel is being laid for three new alleys in the yard.

Local Firm To Run With Changed Name

Announcement Follows Sale of Plant Here

Announcement was made here during the week by R. P. Ellingson, purchaser of the Klamath Lumber and Millwork company, that the name of the mill would be changed to Ellingson Lumber Company.

Under the terms of the sale the Klamath Lumber and Millwork company retained the use of the old name for possible use.

Little change in conduct of the plant will be made at this time, Ellingson advised. Some changes may be made next spring but this is not certain, he said.

MALLOY TO LEAVE

Dan Malloy, head sawman for the Ewauna Box company, will leave next week for San Francisco, where he will enter the wool business. Malloy was formerly an extensive sheep operator in both Laku and Klamath counties.

BOTH SHIFTS RUNNING; SEASON'S CUT WILL BE OVER THIRTY THOUSAND

120 Men Affected by Decision of Company; Logging Camp may Be Opened in Squaw Flat Unit Next Season; May Operate Early

The sawmill of the Big Lakes Box company will run all winter if the weather permits operating two shifts, according to an announcement made by the company yesterday. The seasons cut will be in the neighborhood of thirty million feet, nearly double last years cut, when only one shift was run.

The company's log supply was purchased from contractors this year, but next year a camp may be opened in the Squaw flat unit, where the company has holdings aggregating some sixty million feet. At present there is a surplus of about five million feet in the pond. Steel will be laid in a short time along the new unloading track along the shore of Lake Ewauna. Formerly the logs were unloaded direct from the Sralhorn line and shoved out into the lake through a channel. Wind from the south side made this very difficult at times, but with the completion of the new track lines this condition is done away with.

If the lake freezes, the mill will be started up again as soon as possible.

The sawmill employs about 60 men per shift and the box factory which will operate one shift all winter, one hundred men and women.

Heilbronner Holds Record For Runaway

Team Does Considerable Damage in Short Distance

Fred Heilbronner holds all records for short distance runaways. Last week a team he was driving became fractious and ran a hundred feet between the Ewauna office and the box factory. In this short space they were not exactly idle, however, for the wagon struck the steam line to the office, nearly tore it down, and then crashed into C. H. Daggett's Hudson coach, crushing the hood and breaking the carburetor.

Deceased Hilt Logger Brother of Mrs. Monroe

Vernon Herald Dunford, who was killed by a falling tree in the logging camp of the Fruit Grower Supply company last week, was well known in jogging and lumber circles here. Dunford was a brother of Mrs. Jack Monroe, and had worked in Klamath county in former years for the Anna Creek company, Pelican Bay, Algoma, and other lumber concerns here.

Dunford and his falling partner, Chick Barry, were falling a tree, which, in falling, struck another tree, causing it to kick back off the stump and strike Dunford. He lived five hours after the accident.

The deceased, who was twenty-three years old, was known by the nick-name of "Bunn" in Klamath county.

HAWLEY CO. TO BUILD A PAPER MILL SHORTLY

New Company Formed with Hawley Company Controlling Most of Stock

STARTS IN NOVEMBER

One Unit to be Built at First Five to be Added Later in Season

Willard P. Hawley Jr., vice president and general manager of the Hawley Pulp and Paper Co., Oregon City, Ore., and vice president of the St. Helens Pulp and Paper Co., St. Helens, Ore., announced early in October that plans for the first unit of a pulp and paper mill to be built at St. Helens will be drawn up at an early date. Ground will be broken and it is contemplated to have the first unit of the plant in operation in November, 1926. It is to be erected by a company in which the Hawley Pulp and Paper Co. holds the majority stock. Max Orberdorfer, who designed the paper mill at Manistee, Mich., superintended its construction, and who has since been in charge of operation, has been engaged to design the St. Helens mill, to superintend its construction, and later will take charge of the plant. The plant will be constructed with a view of adding five other units later. S. P. Hawley Sr., is president of both the St. Helens Pulp and Paper Co. and the Hawley Pulp and Paper Co. He will be president of the new paper company, and Chas. R. McCormick, president of the Chas. R. McCormick Lumber company, will be chairman of the board of directors.

Neilson Acts Most Queerly

According to reports from Pelican City, Pete Neilson has been acting a most peculiar manner for the past week. Mr. Neilson has blossomed forth in a suit which unprejudiced observers declare must have cost at least two hundred dollars. Every evening Neilson fares forth, no one knows where, and returns at a late hour.

Nor is this all. Mr. Neilson goes about his duties in a preoccupied manner, with a dreamy smile upon his face, stops frequently, and gazes vacantly into space. At press time we had been unable to discover the lady's name.
