

Is the Theme in the Sermon of Progress

And because we believe in the principle of progress and manifest our ideal in handling better materials for better construction is the reason we are exclusive agents and carry a large supply of the following:

Carey Guaranteed Asbestos Built-up Roofs, Hoffite line of Stuccos and Magnesites, Standard Gypsum Plaster, U. S. Gypsum Line of Materials including Sheet Rock Wallboard, Gypo-Lap Sheeting, Red Top Plaster, Etc., National Steel Fabrics and Duro Plasterboard.

This principle is further attested by the fact that we are now furnishing materials for eight of the largest building jobs now under construction, namely the

R. A. Pilcher Building

—supplying Hoffite Stucco with stone-tone finish for outside structure and Hoffite Magnesite throughout the entire lower floors—Behn Garage, Murray Court Apartments, Altamont Auditorium and Dance Hall, W. O. Smith Building, Munger Laundry, Grizzell Building, and Episcopal Church.

and on the Christian church we are furnishing a new kind of fireproof outside construction known as Hoffite stucco on national steel fabric placed direct to the studs. This is an ideal construction for small homes and residences and any person interested in building a home should inspect this work while it is now under construction.)

There must be reasons for the above sales and they are Quality, Price and Service—otherwise we would not have obtained this business.

In addition we carry a full line of building materials, including all kinds of rough and finished lumber, shingles, lath and lime, doors and windows, cupboard doors and flour bins. Our doors and windows are purchased in straight carload shipments and our motto is Quick Sales and Small Profits.
