GOLDEN RULE IN EUROPE

Things are really moving in Europe, which Americans lately thought so hopeless. There is real progress. Incredible as it seems, the promise held forth by the Locarno treaties is in the way of fulfillment.

A note from the Allies to Germany recognizes that the latter country has largely fulfilled their demands already, and has given satisfactory pledges on the issues still pending. Wherefore the Allies state that they will begin the military evacuation of Cologne on Dec. 1, and will abolish the allied commission of military control in Germany on Feb. 1, if Germany continues doing her part.

The military control of Germany will then be taken over by the League of Nations, in which Germany herself will be represented. Then, instead of the force and bluster that have characterized the situation since the armistice, there will be merely official observation by the League representatives of German compliance with military conditions of the Versailles treaty. Common council and publicity will take the place of coercion.

Whether this is treating Germany more generously and mildly than she deserves is a question that it is no longer profitable to discuss. When France and Belgium, chief sufferers of German aggression, forego hatred and recrimination in favor of conciliation and cooperation, there is no reason why less aggrieved allies and associates should not do likewise.

The spirit shown recently on both sides is really an astonishing development. What it amounts to is applied Christianity in international relations. The Christian world has seldom or never tried that. But something may come of it, if the elder statesmen keep the courage of their new faith. Lesser folks have been telling them for years that Christianity was the only solution for what ailed Europe. The Golden Rule may be the most potent "formula" after all—and the most profitable.

In Politics

Mrs. Jacob Baur, Chicago millionaire, is expected to be a candidate for Congress next spring against Congressman Fred A. Britten of Illinois. She has not announced her candidacy, but friends insist she will make the race. She has been active in Republican politics for years.

CHRISTMAS SEAL WORK WILL HELP WAR ON PLAGUE

What Campaign Means to People Generally Explained by Officials

What are Xmas seals and why are they sold in all states by school children and by mail sale?

A. Xmas seals at 1c each are the only method by which the National Tuberculosis association solicit their funds to carry on their national program of health education and their fight against tuberculosis.

How is this seal sale carried on?

A. Every year during the month of December, school children, in every school all over the United States are given these penny stamps to sell.

Why are children asked to aid in this campaign?

A. Children are the most susceptible to contract tuberculosis. (Statistics show that the death rate from tuberculosis is higher than any other between the ages of 10 to 40 years; therefore every child should be told why he or she is helping to sell these Xmas seals and what will help prevent the children from contracting tuberculosis—namely, that by selling these seals they are actually instrumental in helping to build "free state tuberculosis sanitariums" for those who are suffering with tuberculosis and who are not financially able to pay for a private sanitarium care. (There is only one in Oregon.)

Adults who have tuberculosis should not have the care of children, for by doing so many children contract tuberculosis. Though sanitariums are the place where tuberculosis is treated and often cured; it is not the only object of selling Xmas seals. The most important object is the prevention of disease.

How can we prevent tuberculosis?

A. By buying these seals and putting them on our Xmas packages and our letters, each little seal is a message. It means "HELP TO FIGHT TUBERCULOSIS and help with the education to prevent communicable diseases."

What methods are followed to prevent communicable diseases?

A. To try and be physically fit and in that manner be able to resist contracting communicable diseases.

What activities are carried on in this health education program?

A. Literature is distributed free; posters are made by school children and by adults which will encourage children to carry out health habits. Clinics are held for babies and pre-school children for the diagnosis of defects, which if corrected will prevent this child from contracting disease. School inspections are being carried on by the public health nurse and the teachers of the school children to determine if they are physically fit and clinics are carried on in many forms in the various cities and communities.

What part do we do in our county take in this health program?

A. Klamath county is more fortunate than many other counties, for we have a full time health unit, directed by a full time health officer,

The Brunswick Panatrophe

The ONLY purely electrical reproducing instrument known — the most remarkable of all musical achievements

ELECTRICITY, the force that has changed civilization; that has captured the hidden tones of melody from the air; that has given man light, transportation and power; the force on which the greatest age of human progress is largely built; has now been harnessed so as to bring music incomparably different, wondrously beautiful, gloriously inspiring, without parallel in musical history.

This achievement is the result of the joint effort of one of the world's leading electrical and acoustics laboratories—The Radio Corporation of America, the General Electric Co., the Westinghouse Electric & Mfg. Co., and Brunswick. Only so imposing an effort could have achieved so inspiring a result.

We ask you to hear it... this remarkable Brunswick Panatrophe; an instrument which has commanded front-page attention, for weeks, in the great metropolitan newspapers of the United States.

It is the ONLY purely electrical reproducing instrument as yet known to the world. There is no other like it. It is rated by world's musical authorities, critics and publicists the most remarkable musical instrument known to man.

Compare any musical reproducing instrument you have ever heard, no matter how impressive that instrument may seem, and the Panatrophe will excel it in every standard of musical perfection. Weigh any musical entertainment for the home that you have ever known against it... and in fairness you will say this instrument is far beyond even the imagination of yesterday.

It is an electrical achievement. All future reproducing instruments must come to this principle... this electrical principle... to survive. All music will be weighed against it.

In fairness to yourself, buy no reproducing musical instrument without first hearing the Brunswick Panatrophe. For what you buy today... regardless of how wonderful it may seem to you... may fall obsolete tomorrow before this amazing instrument.

PORTLAND AND KLAMATH FALLS, OREGON

STEWART'S WASHINGTON LETTER

By CHARLES P. STEWART WASHINGTON.—Going home pretty late, some nights ago, I happened to glance upward, toward about the "steenth floor" of a certain Washington skyscraper, and immediately my eye was caught by the peculiar winking of a lone light in an upper story window. They were rapid winks, at slightly irregular intervals.

While no wire or wireless operator, due to past business activities I do know a little about the telegraph code—not enough to read it, but enough so that I recognized, in this winky-wink-wink-winking, something extraordinarily like Morse.

That, probably, is all I'd have thought about it if, passing the same way a night or two later, I hadn't witnessed the phenomenon again. Moved by an undignified curiosity, I got a telegrapher friend to take a look.

"Was even as I'd suspected. Some thirty party was "S. O. S." furiously for licker, and it must have been quite a large party, considering the amount and variety of refreshments it was ordering, from off in the darkness toward Arlington.

The Agriculture Department has been at great pains to tell the world that it has no objection to kissing. Why, you ask, should the department suppose anybody did suspect it of objecting? Because it received a whole stack of letters, accusing it of just that thing.

What happened was this: The department issued a bulletin declaring war on mistletoe. With Christmas so close at hand, the country evidently jumped largely to the conclusion that Secretary Jardine was launching an anti-osculation campaign. In reality, it appears, the bulletin was inspired by the forest service, which dislikes mistletoe solely on the ground that it kills trees.

People blame you for getting into a rat. Yet, along some roads the rat keeps you out of the ditch.

FLORIDA BUILDING FOR PINE LUMBER OPENS NEW MART

Jacksonville and Other Cities Take Big Steamer Cargoes

PORTLAND, Ore.—The steamer Charles R. McCormick, due here Saturday from Atlantic coast ports to discharge miscellaneous freight, will load a capacity cargo of about 4,500,000 feet of lumber for the return trip. The lumber will be discharged at Jacksonville. Lumber yards at the latter city are absorbing great quantities of Northwest lumber for building purposes. The demand for space has been greater than the immediate supply.

The Munaires, a Munson-McCormick line intercoastal carrier, is scheduled to leave Grays Harbor Saturday evening for New York with a full cargo of lumber.

The McCormick line will dispatch the steam schooner Wallingford Saturday evening for California ports with a full general cargo.

Five Million White Cedar to Be Logged

MARSHFIELD.—Hugo Quist returned from Portland this morning after making arrangements for the purchase of equipment for three miles of logging railroad near Powers.

As soon as the new line is completed Quist will begin logging five million feet of white cedar for the Western White Cedar company.

and we have a public health association.

What is this public health association? And what is its object?

A. Klamath county public health association is a branch of the state tuberculosis association and by having a public health association in our own county, we are given a stated percentage of the Xmas seal proceeds to expend in our own county for the health education, for materials to prevent disease, and last but not least to help pay for corrections of defects for those who are not able to pay for their own.

What is done with the other portion of the Xmas seal money?

A. It is sent to the state tuberculosis association, of which a small percentage is sent to the national association; the other money is spent in the state. This year the state T. B. association is paying the salary of the first public health nurse in Lake county and we are doing our bit towards this by the seal sale money which we turn over to the state. Five years ago the children in Lake county did their bit in helping to pay for the first public health nurse in our county.

the stock in the company had been sold. The defendants' demurrer indicated that at the time of the transfer the company was indebted to the bank in the sum of \$34,000.

TIMBER BOUGHT BY LUMBER FIRM

PORTLAND, Ore.—The Telegram says that sale by the W. H. White Lumber company of Boyne, City, Mich., of the timber holdings of the Tillamook Yellow Fir company, in western Oregon, was reported today to be near consummation. White was in Portland and Tillamook several days recently and returned to Michigan last Tuesday.

The consideration is said to be close to \$2,000,000. The tract is said to contain one billion feet of high quality timber.

Several other timber transactions of magnitude in the fir belt of western Oregon and in the pine belt east of the Cascade mountains are known to be under consideration.

The Silver Lining
Police Sergeant—is the man dangerously wounded?
Patrolman—Two of the wounds are fatal, but the other one isn't so bad.

There's Something Wrong Somewhere

McCarthy Goes On Trial for Serious Count

Eight new jurors, called on a special venire issued from the bench by Judge Leavitt when it appeared that the jury panel had been depleted, appeared in court this morning ready to be interviewed as to their qualifications to sit in judgment on the fate of C. K. McCarthy, charged with larceny from a person. More difficulty has occurred in securing a jury for this trial than either of the first two, which were heard this term of court.

Debts Ahead Of Profits, Court Decision Holds

BELLINGHAM, Wash.—Former stockholders of the United Shingle company at Blaine lost in their action against E. W. Purdy and the First National bank of Bellingham, when the court ruled that liabilities come before dividends in the proper course of business. The stockholders sued for a refund of \$8,402.13 from income and excess profits tax remitted by the U. S. treasury after

WOOD

—THANKSGIVING DAY—
We are going to donate our teams, wagons, trucks and the apkeen on them free to the

AMERICAN LEGION

Building Fund. Our employes are giving their services, Pellona Bay, Big Lakes and Algonia Lbr. Co.'s are donating wood, and the entire retail price of the wood goes to the American Legion Building Fund. If you want a load of blocks, delivered Thanksgiving Day.
