It's the MODERN SCIENCE
CHIROPRACTOR
The Door to Health,
Nervous maladies, which seem to defy analysis, aches and pains, coming apparently from an unknown source, suffering and unhappiness, dragging on year after year. These are the unfortunate experiences of many persons.
And it is to these that solace and relief are offered. The door of Health may stand open, yet you have not taken advantage of it. The scientific ministrations of the Chiropractor are now known to the entire world. Yet, since its inception, it has sought only to present another solution for Man's ills, and by its heroic and helpful deeds it is now universally acclaimed. It is modern only in the light of its recent full-hearted recognition by all thinking people: as a science, its marvels were recognized many generations ago.
My service is worth investigating. Preliminary analysis without charge.
