The Better BUICK
Starts easily
Runs smoothly
Stops safely
and the Buick engine is full-pressure lubricated
Buick is a better Motor Car—In Every Kind of Weather

Buick motor cars are designed to run efficiently in every temperature, and under every climatic condition.
Buicks start quickly, even at zero. The new, high-speed starting motor accomplishes this most desirable result.
Buick Automatic Heat Control reduces another cold-weather starting annoyance—that of bucking, spitting, misfiring engine. The exclusive Buick feature heats the fuel supply, and saves gasoline, automatically and immediately.
In rain, snow or sleet Buick mechanical 4-wheel brakes stop the car firmly in a straight line. Neither heat nor cold affects the direct mechanical action of these brakes. There is no liquid in them to expand, contract or leak away.
The Buick engine is full-pressure lubricated. Every part gets a flood of oil as soon as the engine starts, every day in the year. An emergency feed tube siphons oil to the pump, even though the cold has congealed the oil around the pump screen.
