Special Prices

Why Do Merchants Use Special Prices?

When a merchant quotes special prices he admits such items are priced cheaper than the balance of his merchandise. If not there would be nothing special.

Compare "Specials" with our regular price—then remember all our other merchandise is just as cheap as that which you are comparing with specials.

Any merchant can take a little profit off a dozen or so items of his entire stock but it's the price you pay for each item you purchase each day in the week that counts.
