Smaller down payments and smaller monthly payments; the lowest credit cost in the industry

MILE in and mile out—on the longest tours—over rocky mountain roads—up steep winding grades—or swinging along the highway—this Overland Six dominates by its great energy.

The low swung, gravity balanced motor, sending its full power in a straight line to the rear axle, conquers every driving demand—it will out-run, out-pull, out-accelerate any other power plant in anywhere near its price or size class.

The gravity-balanced chassis and body, with the weight kept low to the ground, gives a road stability that affords an unusual feeling of comfort and safety on curves and where the going is rough.

Back in town, the quick pickup, as you open the throttle to get out of the traffic jam, keeps you well ahead of the other cars on the street.

In appearance, the graceful lines, rich color tones, luxurious upholstery and quality finish make this car look fully \$500 better than its price.

Try it out. ~ Learn what gravity balance and real usable power can bring to light six performance.
