degree in

Union Gasoline

Non-detonating

Union Gasoline provides, and always has provided to Western motorists, the *non-detonating feature* which supplies full power to the pistons throughout their entire stroke and eliminates all explosive "knocking" or "pinging" in the hills or in heavy pulling—a quality for which Eastern motorists are now buying "special gasolines" and paying 3 cents per gallon in excess of usual prices for them. Yet Union costs no more than other high grade fuels.

Always use Aristo Motor Oil with non-detonating Union Gasoline because this combination minimizes carbon to the extent that motors in good condition are run for several years without it.
