Perfection Milker

Because it has superior points that appeal to their judgment such as the following:

Milking with 100% vacuum, which means safety for the cow.

With a squeeze from the udder downward, like nature.

With a pulsator that can be regulated for suction and squeeze. With a slow running pump that runs in oil.

With the Aluminum Pail which stands for quality.

With a simple positive pulsator that runs steady.

Read what some of the users say about it: D. J. Burch, White Bluffs, Wash.—"If I had to go back to

hand milking I would quit the business." Ransom Minkler, Elma, Wash.—"Hoping you may have a lot of success this year in distributing what I believe is the best milking machine on the market, I remain, yours truly." A. H. Caples, Long Beach, Wash.—"Will say I think I got more milk with the milker than by hand and think the cows stay up in their milk longer. I think it is a great success."

Let us mail you a catalog telling all about the Perfection.
