Avoid Poorly-Balanced Breakfasts

Quaker Oats supplies excellent "food balance"

If you feel tired, hungry, "fidgety," hours before lunch, don't jump to the conclusion of poor health. You may have unenergetic mornings because your breakfasts lack certain important food elements.

To feel right, you must have a well-balanced, complete breakfast ration. At most other meals—lunch and dinner—you get it. But breakfast is a hurried meal, often badly chosen.

Thus Quaker Oats, containing 16% protein, food's great tissue builder, 58% carbohydrate, its great energy element, plus all-important vitamins and the "bulk" that makes laxatives seldom needed, is the dietetic urge of the world today.

It is food that "stands by" you through the morning. Don't deny yourself the natural stimulation this rich food offers you.

Get Quaker Oats today. Grocers have two kinds: Quick Quaker, which cooks in 3 to 5 minutes, and Quaker Oats.
