Graham Brothers Trucks Leading

Graham Brothers trucks have been given the highest of tributes in the official commercial vehicle registration figures of the last year for Greater New York. These show that in the combined 3-4, 1 1/2 and 2-ton gearshift truck field, capacities which serve 91% of all trucking requirements, Graham Brothers lead all other makes.

Trucks operated in New York City must survive probably the keenest merchandising competition of any population center in the world. The relative dependability and low operating cost of delivery equipment used by merchants is oftentimes a matter of business life or death.

This is the basis on which Graham Brothers are establishing their lead more and more thoroughly in the metropolitan transportation market. Built to fit the user's business, these trucks stand up to the daily grind of work with capacity loads in heavy traffic at minimum maintenance cost.

Registration Of Autos Is Given

According to the Oregon Motor Register, the following new cars were registered in Klamath county during February: Buick, 5; Cadillac, 1; Chevrolet, 12; Essex, 6; Ford, 29; Hudson, 1; Hummobile, 2; Nash, 2; Oldsmobile, 1; Overland, 2; Pontiac, 1; Star, 1; Studebaker, 1.

Game Warden Is Owner of Dodge

George Tonkin, United States game warden for Northern California, purchased a special Dodge sedan during the past week from the Ostendorf Motor company, and is now using it in his work around the Tule Lake country. Mr. Tonkin has been in this section frequently investigating the duck malady.

NEW HUDSON IS STAR BUILDER NOW DISPLAYED WINS PRAISE

One of the most talked of cars of the year—the Hudson Super-Six—is receiving a special showing at the salesrooms of the Acme Garage, Hudson-Essex distributor. Now that the Spring season is here, this car is repeating the hold on public attention which it secured when introduced the first of this year. Scores of motorists are looking over its interesting points.

"In appearance and value as well as performance," said John Martin, "the brilliance of the new Hudson Super-Six is equaled only by the costliest cars. With the new Hudson you will never feel that the slightest effort is exerted by the motor in traveling as you wish, whether for short, swift spurts or sustained all-day runs. Low Center of Gravity. You round curves safely, due to the new low center of gravity. You do not shimmy. At all speeds, it is the easiest and safest driving and riding car in Hudson history. It is simply superb. The Super-Six principle is freed to the limit.

"Yet with all its marvelous power, comfort and performance—unlike anything American motorists have known—it is economical to operate. On road trips we have averaged from fifteen to seventeen miles to the gallon of gasoline and the car was being newly broken in, has just come from the factory when we started. Ease and Comfort. "In all the new car does, there is effortless ease. So perfect is its action and so unlike what one has been accustomed to in an automobile, that it is hard to describe it in words. The swift, smooth glide into motion—then to sustained high speed—then back to the soft, instantaneous stopping action of its four-wheel brakes—all are seemingly done without effort.

Lou Arens Plans Used Car Policy

Lou Arens, head of the L. O. Arens company, local Chevrolet dealers, is dishing out a new used car policy which he expects to insure the buyer nothing but good serviceable used cars and at the right price.

OAKLAND, April 12.—Hundreds of letters, wires and long distance telephone messages have been received from all sections of the Pacific coast region by Norman deVaux, active head of the Pacific Coast Star Car factory, congratulating him on the announcement of W. C. Durant's selection of the Star Car as the nucleus for the new Consolidated Motors, Inc.

In the past, W. C. Durant has twice built up great organizations around a single motor car manufacturing company. First, he took the Buick and with that car as the nucleus, he built the General Motors Corporation. Then later, he took the Chevrolet and developed it to an organization that was strong enough to be used as the nucleus for the reorganization of General Motors.

With the reorganization of General Motors around the Chevrolet, W. C. Durant again took control of the great corporation and he personally headed the vast organization, supervising both production and sales of all the various products.

1927 Dodge Six Will Be Hummer

"The new Dodge six is going to be a hummer," was the way W. F. Hufstader, district manager for the Dodge cars, put it when he came in from Portland to spend a short time with Mr. Ostendorf, the Klamath Falls dealer.

Joe Davis Back Selling "Chevs"

Joe Davis has returned from Sacramento and is now selling Chevrolets for Lou Arens. He is working the camps up around the Chiloquin country this week and expects to return to Klamath over the week-end with several orders in his inside pocket.
