Building Confidence

THE business man is realizing more clearly each day that the appearance of his office, his store, or his bank—the place where he meets his clients—leaves an indelible impression on the minds of those who enter.

For the great business executive to furnish his office with the cast-off relics of a by-gone day would be as illogical as for him to wear the rags of a vagabond. It would visualize to those who call upon him a lack of the personal qualities and abilities which they desire in one whom they patronize.

There is an advantage in selecting standard equipment for your office, even tho you only purchase one piece at a time.
