

Girl Would Not Leave Drowning Man Succumbs

SPOKANE, Wash., May 2.—Miss Irene Jackson, 22, heroically gave her life yesterday because she refused to swim ashore and desert Patrick J. Dowling, 67, after the row boat in which they were riding with C. H. Wells on Hayden lake, near here, was swamped.

Dowling also was drowned but Wells was rescued two and a half hours after the accident, delirious and exhausted, clinging to the overturned boat.

The girl and Wells were expert swimmers and could easily have reached shore but they refused to leave Dowling. The three clung to the boat for two hours before Dowling and the

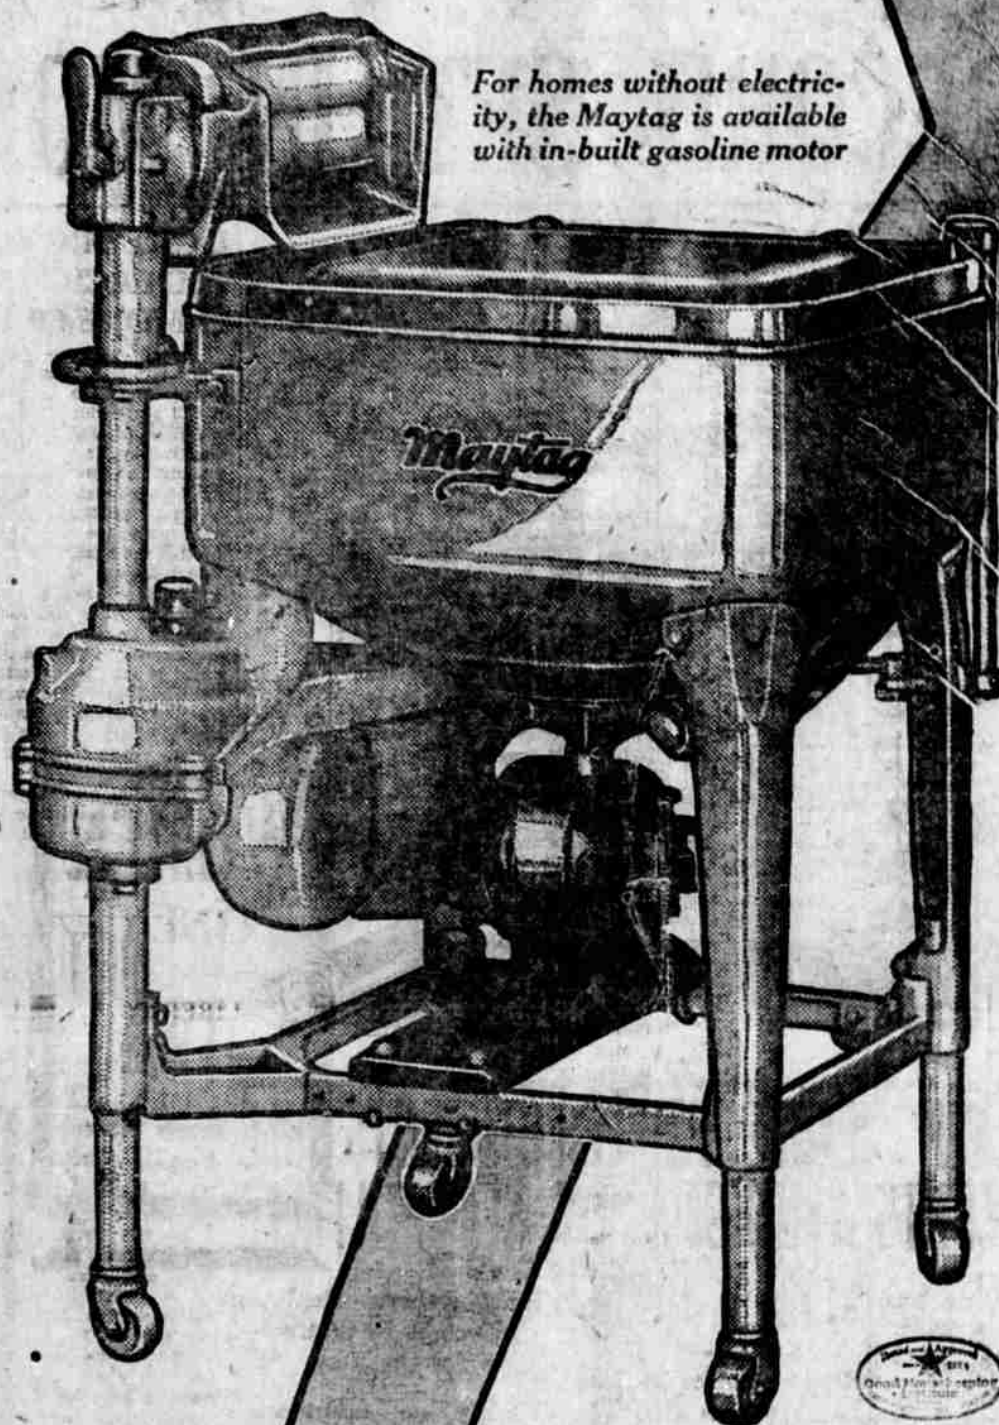

girl were swept away by the waves. Wells was too exhausted to aid them.

The Importance of the MAYTAG Cast-Aluminum Tub

For homes without electricity, the Maytag is available with in-built gasoline motor

FIRST of importance among the Maytag's exclusive features is the tub, because that's where the clothes are washed. The Maytag tub is built of cast-aluminum—a material that will not rot, rust, warp, split or corrode. It is specially, scientifically shaped to give a highly turbulent water action in conjunction with the Maytag Gyrtator. No other material possesses such persistent heat-retaining qualities—the water in a Maytag is still hot at the end of a big washing.

The Maytag washes a big tubful of clothes in 3 to 7 minutes, half the time required by ordinary washers. It removes stubborn edge-dirt from collars, cuffs and wristbands without hand rubbing. This satin-smooth tub is hand-careful with delicate clothes, and it is a roomy tub—holds four gallons more than ordinary washers.
