Are You Gambling With Your Home?

The owner of an uninsured home is simply betting his home against a small insurance premium that he will never have a fire.

The owner of a partly insured home has lowered the stake, but otherwise he is doing the same.

The owner of a partly insured home is a man too wise to gamble against an opponent that takes \$500,000.000 annually from the American public.

We can offer you fire insurance, in any amount, in thoroughly reliable, prompt-paying companies.
