Turkeys And Grasshoppers

The ill wind that blows no good is much talked of and it is difficult to imagine how a grasshopper wave, such as Tule lake is now experiencing, could be productive of good.

However, there is one faithful subscriber who always sees the silver lining to every cloud and that good soul insists to the Herald that the grasshoppers have been sent in order to stimulate the production of turkeys in the Tule lake region.

"For," he argues, "is it not a fact that the turkey and grasshopper go together in the scheme of life and wherever you find the active grasshopper there also you should find the turkey feeding on the hopper and preparing himself for the Thanksgiving dinner table."

This bit of consolation is respectfully referred to William Dalton and his neighbors down where the grasshopper torches are burning and cremation of millions of hoppers is taking place daily. It is no fun to be a grasshopper down there, that is the unlucky ones who get burned. But there are many hundreds of millions who seem to escape the death torch, or liquid fire, and live to raise more little grasshoppers. It is these that the turkeys are asked to serve, and perhaps the subscriber is right, the hopper may lead a big turkey industry into this Basin which otherwise would not have been developed.

Remember

"Am I my brother's keeper?" It is an old expression and is frequently used when it does not exactly apply.

For instance, in the road bond question now up for consideration. Quite a few have remarked that they are through with road business, that they have all the roads they want and need and therefore they are no longer interested.

Perhaps that is a narrow way to view Klamath county's road problem. No one is through with any problem in this county when development of the county is at stake.

No one is through with any problem that to solve it means a greater volume of business to the business people of Klamath Falls and every other town in the county.

No one is through with a question that involves the marketing of lumber and farm products at a less cost; that insures opening up of new lands; that insures the establishment of new homes, more dairy herds and greater production of lands.

Remember, highways for joy riding are fine, but highways for service and business are far more needful.

BIG INCREASE IN AUTO SALES

Willys-Knight Great Six is
Proving to be One of
Most Popular Cars

With the Willys-Knight Great Six holding a place of unusual popularity among the motor car buyers, production of these models at the Willys-Overland plant in Toledo has been stepped ahead for the past two months at a rapid pace to meet the sales demand. The Great Six line maintained its leading position in the better car class during the early automobile shows of the year and the response of buyers throughout the country is responsible for the increased production schedule for this model.

Since the new models were presented in January the sales figures have mounted steadily and with the coming of spring the sales showed an unusual impetus with indications that 1927 will see the sale of this quality car striking a new high mark. This fact is attested by Willys-Overland dealers who declare that never before have buyers of motor cars in the higher priced range shown such a decided preference for the Great Six even though this model held a position of leadership in its price field last year.

Although the Great Six Foursome, a 1927 addition to the line has had an unusual demand since its introduction, the fast approach of warm weather has brought about an increased sale of the Great Six Varsity Roadster. This smart, powerful model of the sport type looms as a leader in its group, according to the influx of orders from dealers.

The Great Six Varsity Roadster has an especial appeal to those who desire the open car type and it is but the work of a moment to convert it into a closed car by raising the collapsible top and adjusting the side curtains. Another sporty feature of this car is the spacious rumble seat built into the rear deck. The auxiliary seat provides ample room for two extra passengers.

Long, sweeping and graceful lines characterize the Great Six cars. The bodies are slow swung giving unusual road stability and added driving safety.

The Great Six models are powered by the Willys-Knight sleeve valve motor, presented this year with improvements which include a re-designed manifold, giving a greater fuel economy and pickup; a new type air cleaner which cleanses all the air taken through the carburetor to the engine and a Willys-Knight

oil rectifier which minimizes the quantity of oil consumed because it effectively prevents oil dilution.

In addition to the Foursome and Varsity Roadster the Willys-Knight Great Six line also includes a four passenger Cabriolet Coupe and a five and seven passenger sedan.

43 Tons of Ice
Taken by Trains
Here in One Day

A record poundage of ice, used in ice refrigerators of the Southern Pacific trains passing through Klamath Falls over Sunday, totaling 43,000 pounds, was handled by The Klamath Ice and Storage Company.

"With hot weather coming on, this record, no doubt, will not stand long, but when you consider that means 43 tons in one day, it is a high record," Andrew Collier, President of the company said today.

BOUND OVER

Ed. Wakefield, Klamath Falls, has been bound over to the federal grand jury on the charge of possession of intoxicating liquor. Wakefield raised the bond set by United States Commissioner Bert C. Thomas and was released pending consideration of his case by the federal inquisitorial body. Wakefield was sentenced to 60 days in jail and fined \$500 on a similar charge last year, officers said.

Now we must congratulate the German government. For is there anyone under the sun who could have received Chamberlain and Levine more politely than Dr. Curtius?

JENNINGS TENT SHOW

Carnival Drawing Crowds of People on South Sixth St.

Clean shows, new and brightly painted riding devices and a general spirit of orderliness prevailed at the carnival grounds on South Sixth street again last night where the Pacific States Shows are playing for the week.

Hey-Day and Over The Jumps, a couple of new riding devices never before shown in Klamath were among the most popular attractions with the big crowds last night, although the ten shows and concessions of various kinds drew their full quota of merry-makers.

The pit show was much better than had been expected, the attractions in the big oblong pit being genuine in every particular. The sword swallower, the fire-eater and the pin-headed woman were the stellar attractions of the pit show. The man with the curved spine whose heart has grown on the right side of his body was an interesting study for many people.

For the kiddies the carnival has provided a group of miniature riding devices, including a ferris wheel

with cages, making it absolutely safe for the youngsters; a small whip, a miniature merry-go-round, airplane and other tiny riding vehicles to delight the youngsters.

The carnival midway is a blaze of lights and the management has provided guides to help people about the ground and to maintain order at all times.

Would Check Smuggling.

ST. JOHN, Kan., June 22. (AP)—A recommendation that 90 percent of roads crossing into Maine be closed has been made to the Royal Customs Commission, as a means of blocking the flood of smuggling.

When you need glasses, go to the best Optometrist you can find. Have an accurate test made, then take his advice regarding the style of glasses best fitted for your case.
