# CELITE

IN CONCRETE

**INCREASES WORKABILITY  
DECREASES LABOR**

Celite is a specially prepared form of extremely finely divided silica. Small percentages are added to concrete mixtures to increase WORKABILITY and insure WATER TIGHTNESS. Being composed of practically pure silica Celite does not affect the time of setting and is the most permanent ingredient in concrete mixture.

It is to the interest of Contractors and Engineers to be familiar with the qualities this material imparts to all concrete mixtures. Once used it will be regarded as a necessity.

**To the Engineer—**  
Uniform Concrete.  
Water-tight Concrete.  
Stronger Concrete.  
Drier Consistency and Less Segregation.  
A smooth surface and more pleasing structure.

**Economy in Concrete**

**Workability Means**

**To the Contractor—**  
Decreased labor costs for placing.  
Quicker discharge from mixer.  
Less honeycombing and patching.  
Decreased costs.

**We use Celite in our Ready Mixed Concrete  
For further information call at our**
