"38-40"

Who killed Johnny Ansel?
That question has been asked thousands of times in the past few days, but no one can answer it with definite authority.

The newest answer comes from Barney Chambers, Johnny's employer, and for eighteen years a close friend. Barney is a frontiersman himself. He knows the rough life; he knows rough characters and their habits; he also knows guns.

The bullet that ended Johnny Ansel's life was from a "38-40" calibre gun. At first Barney Chambers could not figure out the calibre of the bullet. It looked different from other bullets—it was different. He thought it was a .45, then careful analysis showed it was a "38-40." Chambers began to look up gun records. He found only three guns of this calibre in the county, for he sells ammunition to almost every gun owner in Klamath Basin.

Gradually the evidence began to pile up until Barney Chambers was forced to suspect in his own mind a man whom he had known for a long time. It was no easy matter, but the gun was an odd one, the ammunition it used was out of the ordinary. Other things presented themselves until Barney felt justified in asking authorities for the arrest of the man.

For that reason the attempt was made by the sheriff's office to induce the owner of the "38-40" to come to town. This failed, and instead of coming to Klamath Falls the man is probably in the wild mountains of Canada today.

But the point the Evening Herald wishes to bring out in this editorial is that that "38-40" may be the tell-tale evidence which will finally locate the man who killed Johnny Ansel.

Why a Chamber of Commerce?

The reasons for having a Chamber of Commerce have been many and varied. Quite a few believe that there should be no chamber, but this element is growing fewer and fewer each year. The best lecture on the need of a Chamber and what it really is comes from J. Frank Jarrell in the Nation's Business. Mr. Jarrell says:

"Why a Chamber of Commerce? A Chamber of Com-

merce is the personified business of a community speaking and acting for the common good.

"Show me a live town and I will show you a live Chamber of Commerce. A dead Chamber of Commerce means that the town has gone to sleep. In other words, a town is known by the Chamber of Commerce it keeps.

"No individual, firm or corporation can organize a civic enterprise and carry it to a successful conclusion single handed. Such work requires co-operation of all interests, and such co-operation can be obtained only through an organized body. There is no exception.

"This does not mean that individual initiative is to be discounted. It means, rather, that the Chamber of Commerce gives the widest scope for individual initiative to assert itself.

"The Chamber of Commerce, however, renders ineffective that deadly jealousy which so often confronts individual initiative in civic development movements. When individual initiative is exercised in a Chamber of Commerce, it does not stand out boldly as such, for every member of the organization has an opportunity to discuss the initiatory measure proposed. If it is any good, he can adopt it and make it in part, at least, his own individual initiative.

"The human family has adopted marriage and home as the best plan so far devised for the comfort and convenience of the race. Likewise the city has adopted the Chamber of Commerce as the most dependable instrument so far invented for civic progress."

Come now, let's get to work. The holiday season is over and this is the year of 1928, with accent on the 8. There is much to do and only willing hands will make the task light.

Anyway, the cold weather treated Klamath very good. We were about ten degrees warmer than most sections of the interior country.

Radio Program

KGW, Portland.—6-7 p. m., dinner concert; 7-8, studio entertainment by Equitable concert orchestra; 8-9, Wrigley hour; 9-10, Longines time signals; 10-11, Memory Lane; 10-11:30, concert by Motor Coach Entertainers; 11:30-12, Hoot Owls.

Woman's Heart Smaller Than Man's, Many Tests Disclose

By Dr. Morris Fishbein
(Editor Journal of the American Medical Association and of Hygiene, the Health Magazine.)

The bodies of men and women differ not only in the external characteristics and in their internal organs that are specific for each sex, but also in the general reactions of the body to various conditions.

Physiologists in the University of Michigan have made a special study of differences in the heart action of the two sexes. The term here used refers to the physical powers of the heart and not to the emotional reactions, which constitute an entirely different story.

The sexes were compared by studying the reaction of the heart while men and women were standing, sitting, and lying down. Apparently the heart of the woman beats just as vigorously as that of a man. Indeed, the period of contraction is longer in the heart of a woman, apparently because the heart of the woman has more blood to pump relative to the size of the body than does that of a man.

Probably also the contraction is longer because the hearts of women are smaller in proportion to the size of the body. The weight of the heart of man is about 10 per cent more than that of a woman of equal body weight. Apparently this is due to the fact that men have always had a greater amount of physical activity.

The pulse rate and the num-

ber of heart beats are greater in women than in men, and they slow down less under the influence of gravity and position. These figures all seem to be due to the same factor, namely, the fact that the heart of the woman is smaller and that it pumps a greater volume of blood in relationship to the size of the body.

Meeting at Linkhaven.
The "Contemporary World Literature" study group of the American Association of University Women will hold its regular meeting at Linkhaven Saturday

afternoon promptly at 2 o'clock. A study is being made of French literature. The afternoon's program will consist of a criticism of Rostand by Mrs. May Myers; review of the drama "The Red Robe" by Mrs. Robert E. Watkinson; a study of the dramatist, Paul Hervieux by Mrs. Hal Orle. Every woman who is interested in the study work of this group, whether a member of the association or not, is cordially invited to attend the meeting on January seventh.

Visited Parents.
Barton Frulan, who is employed by the Southern Pacific company at Klamath Falls, is spending a few days in Ashland visiting his parents, Mr. and Mrs. Walter H. Frulan on H street. Frulan is a brakeman on the H. P. railroad.—Ashland Tidings.

Do Your Feet Hurt?

Have you weak or flat feet? Have you corns, calluses, ingrowing nails, warts or bunions?

PACKARD EIGHT PRICES REDUCED

PACKARD'S own Custom Eight cars are today reduced in price as follows:

MODEL	OLD PRICE	NEW PRICE	REDUCTION
Seven Pass. Sedan Limousine	\$5250	\$4550	\$700
Seven Passenger Sedan	5150	4450	700
Two Pass. Convertible Coupe	4950	4250	700
Two Passenger Coupe	4800	4150	650
Five Passenger Club Sedan . .	4950	4450	500
Four Passenger Coupe	4950	4450	500

The Packard factories are busy to capacity—busier than ever before in nearly thirty years of fine motor car building and at a season of the year when activity is least expected. It is but good business for Packard to share its prosperity with those who buy its products. Therefore the new prices.

There has been no change in quality. Each car is identical with those Packard has been building. The new prices continue to include complete custom equipment and unlimited paint and upholstery options costing hundreds of dollars extra on many cars. This, together with today's price reductions, gives the Packard Eight an important first cost advantage.

The lower prices make it possible for many additional thousands to step up to the possession of America's finest and most modern car.

We shall be pleased to put this great car into your hands for a demonstration and in return ask only the privilege of telling you what your present car is worth in part payment. Any Packard may be purchased on our payment plan.

(Prices do not include freight and Government tax)
