uses a cup of
SUGAR
in boiling ham

A famous cook gives his recipe

A MAN, famous among his friends for his fine cooking, was asked the secret of his delicious boiled ham. He gave this simple recipe: Put a cupful of sugar in the water that boils an average size ham. Also one-half cup of vinegar. Try this and see how much it improves the taste and flavor of the ham.

Every good cook knows that there is no substitute for sugar in improving the enjoyment of other foods. Whether in preparing fresh vegetables, fruits or meats, sugar is the secret of successful cookery.

Sweetness is nature's perfect flavor. It is also the cheapest nutriment that you can buy.

Health comes from eating good foods, flavored to please the taste. Beware of extreme reducing diets. They are dangerous. Eminent medical authorities warn us that permanent injury often results from starvation diets.

Be sure that you and your children are properly nourished. Eat enough of varied foods, sweetened for enjoyment. The Sugar Institute.
