MILLION FRIGIDAIRE

have been built

With every department of the Frigidaire factories running at maximum capacity, with orders greater than at any time in the history of the business, on Thursday, May 16th, the Millionth Frigidaire was built

In both the Household and Commercial fields Frigidaire leads in sales to customers

THERE are definite reasons why more Frigidaires are in use than all other makes of electric refrigerators combined; why it is the choice of home owners, of builders, of apartment owners, of commercial refrigeration users throughout the world.

Beauty, power and convenience
Frigidaire has surplus power that meets every emergency in the hottest weather, and yet operates economically always.

Frigidaire cabinets are beautiful—they are finished in gleaming porcelain enamel, or white Duco—clean and easy to keep clean. The mechanical part is completely enclosed and so quiet that you don't hear it start, stop, or run. Food shelves are elevated so that stooping is unnecessary.

The famous "Cold Control"

And in addition to the standard temperature regulator which automatically maintains an ideal temperature in the food compartment, Frigidaire is equipped with the famous "Cold Control" that speeds the freezing of

ice cubes and makes possible dozens of new and delicious desserts and salads.

Low Prices

Because Frigidaire has achieved the million mark—because it is the overwhelming choice of the majority—the economies of quantity production have made prices so low that every model represents a tremendous saving to the buyer.

The D-4 Frigidaire, equipped complete, delivered and only **\$1.99** with the "Cold Control" eating in your home
