PALATABLE FOODS WIN APPETITE

Scientist Urges Healthful Use of Sugar

"An important thing to remember about eating is that we should enjoy our food," says one of the country's eminent food scientists. "Remember that sugar is one of the finest condimental foods in the world."

He goes on to explain that sugar is nature's incomparable flavor. It helps to relieve the monotony of our daily diets. It is an aid to nutrition and health because it adds to the enjoyment of eating, and for that reason enables us to eat a greater variety of other healthful foods, by improving their flavors.

"Sugar is wholesome," he said, "and it is inexpensive. Everyone can benefit from this flavor which adds so much pleasure to nearly all the other foods we eat."

The advice of this famous man can be carried out in planning almost all daily dishes. Fresh or cooked fruits are full of minerals, vitamins and other elements necessary in the diet. They are made more delicious to our taste by the addition of sugar.

The flavors of nearly all vegetables are very much improved by adding a pinch of sugar in cooking. Sugar in connection with chocolate or cocoa makes milk a delicious beverage. Most foods are made more delicious and nourishing with sugar. The Sugar Institute.
