

NEWS IN BRIEF

Mrs. Dubois Improved—

Mrs. W. C. Dubois is improving rapidly from serious injuries sustained in an automobile accident a fortnight ago. The car in which Mrs. Dubois was a passenger swerved on the road in an attempt to avoid hitting a cow, and caused injuries to Mrs. Dubois. She was taken to the Hillside hospital, and is still under treatment there. It is expected that she will be able to return to her home in Klamath Falls, Mont., the last of this week. Mrs. Dubois will be accompanied by her daughter, Miss Daisy Dubois, who remained in the city with her.

Redecorate Store—

Moe's store is being entirely redecorated this week, and patrons entering the store will notice the added appearance. The walls and ceiling have been painted and all woodwork painted. A pearl gray base is being used with a French gray trim. A diamond pattern linoleum has been laid on the floor throughout the store, and this carries out the gray color scheme. The store is to be finished by Saturday.

Funeral Postponed—

Funeral of the late Florence John Scanlan of Macdonald, Calif., which was to have been held Thursday morning, has been postponed until Friday morning at 9 o'clock at Sacred Heart church. Burial will be at the Earl Whitlock Funeral Home this evening at 7:30.

New R. F. D. Carrier—

Charlotte Wright has accepted a temporary position as R. F. D. carrier for the local postoffice on Route 1. Miss Wright is a school teacher, and has accepted a position with the local schools for the coming term.

Visit Scout Camp—

Earl C. Reynolds, executive secretary of the chamber of commerce, accompanied by Asa T. Williams, visited the boy scout camp at Lake O' the Woods last evening, and reports the boys all in perfect condition and enjoying themselves immensely. Mr. Reynolds and Mr. Williams enjoyed the scout camp fire last evening before their return to the city.

Call Chamber of Commerce—

Cars making the trip to the boy scout camp at Lake O' the Woods are asked to call Earl Reynolds at the chamber of commerce if they have ample room to take some provisions with them to the camp. There is always a supply of things to be sent to the camp, and it will be appreciated if those having room to take some of it will do so.

Visiting Mr. Hall—

Keron Craig and Mrs. Charles E. Newcomb of Tulsa, Okla., are visiting Bert Hall of the Hall hotel while in the city. Today Mr. Hall took the visitors on the circle route to Crater Lake, via Ashland, Medford and Prospect. They will return from the trip this evening.

Chehalis Residents Here—

Mr. and Mrs. F. G. White, connected with the First National bank of Chehalis, Wash., are visiting in Klamath Falls for several days. They also plan to motor to Crater and Diamond Lakes for a few days outing before returning north. This is their first visit here.

Will Return Soon—

Mrs. Carl Caldwell of Chiloquin and Mrs. Geneva Bratton of Fort Klamath are expected to return the last of this week from Vancouver, where they have been attending the sectional convention of Yoseben. While in the north they are also visiting in Portland and Seattle.

Visited Here—

Hugh Hanklin, Ashland forest supervisor, visited in Klamath Falls the first of the week with local officials.

Returned Home—

Mrs. C. Alderdice, sister of Mrs. Otto Ellis, has returned to her home at Bly, after visiting for a week at the Ellis home on High street.

SCIENCE LEARNS CAUSE OF MOST HUMAN ILLS

Recent Discoveries by Medical Science Prove Conclusively that Constipation—Indigestion—Dyspepsia—Biliousness—Hyperacidity—Auto Intoxication—Disturbed Heart Action—Overloading of Kidneys with Consequent Excess of Uric Acid in the Blood—Headaches—Nervousness—Bad Breath—Coated Tongue—Sallow Complexion—Sluggishness—Sour Stomach—Loss of Weight—Loss of Vitality—Loss of Appetite—Rheumatic Pains Due to Toxic Poisoning—and Mental and Physical Inefficiency Can be Traced, in most Cases, to One of Three Things, a Sluggish Liver, Impoverished Blood or Improper Glandular Activity.

If These Vital Organs and Fluids Are Not Performing Their Proper Functions—Sickness—Suffering and Ill Health Are the Inevitable Results.

The commonest and greatest curse of any of these is constipation. It is man's greatest enemy. It poisons him, slows him up mentally and physically, breaks down youthful strength and vigor, ages him prematurely, and leaves him an easy victim to the attack of almost countless diseases.

EVER since the dawn of civilization, mankind has been searching for drugs and medicines that would give relief from these common ills.

Two thousand years ago, Hippocrates, history's first physician, was trying to cure constipation by using purgatives. And until recently, millions of people throughout the civilized world have been trying to do the same thing—with the same lack of success that Hippocrates had.

Purgatives and laxative drugs have never cured constipation—and never will.

Within the past few years Medical Science has made some amazing discoveries—discoveries that will have a far-reaching effect upon the health and well-being of mankind. These discoveries absolutely disprove many of the beliefs, practices and theories that we have known for a life-time.

For centuries we have believed that bile was a harmful nauseating substance that made us sick, or bilious. Medical science has now proven conclusively that bile is in reality and in fact, a veritable health-giving and life-sustaining fluid with many all-important functions—and that biliousness is not due to too much bile, but to a lack of it.

In attempting to stimulate the liver and increase the bile flow, Calomel is the drug that has most widely used throughout the world for many years. And now science has proven that this poisonous, nauseating chemical has no action whatever on the liver or bile flow and that it confines its action to the intestinal tract. It is a purgative and nothing else.

Here is what an eminent authority has to say about Calomel: "Contrary to the belief adhered to for many years, calomel has no action on the liver or bile flow. This belief existed and was based on the color of the stools after the administration of calomel. It has, however, been thoroughly demonstrated that the characteristic greenish stools are colored by the calomel itself, and does not indicate the presence of bile.

"Calomel is a mercury compound which exerts a cathartic action through the irritating effects of small quantities of mercury which are liberated from it. Large doses of calomel probably favor bacterial increase by lessening intestinal resistance. It is not suited to long use because of its systemic action."

Having made this discovery, scientists then began a world-wide search for something that would stimulate and invigorate a sluggish liver to action.

- 1 That Calomel has no effect whatever on the liver or bile flow and confines its action to the intestinal tract.
- 2 That the cause of eight out of ten cases of stomach trouble has nothing whatever to do with the stomach itself.
- 3 That indigestion, dyspepsia and constipation are due, in the great majority of cases, to an insufficient flow of bile caused by a sluggish liver.
- 4 That biliousness is not due to too much bile, but to a lack of it.
- 5 That to enjoy good health, the liver must manufacture an average of three pints of bile every twenty-four hours.
- 6 That bile, in place of being a harmful substance which makes us sick, has many all-important functions.
- 7 That bile is a powerful digestant without which food cannot be properly assimilated.
- 8 That bile is Nature's own laxative, so certain in its action that people with a normal flow of bile are practically immune to constipation.
- 9 That bile is an antiseptic and lessens bacterial growth in the intestines and combats putrefaction and the formation of gas. It is also an alkaline and counteracts hyperacidity.
- 10 That bile is, in short, a veritable life-sustaining fluid. If we lack it, the process of digestion, assimilation and elimination becomes deranged, causing many gastro-intestinal disturbances.
- 11 That seven out of every ten people past the age of thirty suffer from an insufficient flow of bile caused by a sluggish liver.
- 12 That there is no drug or medicine which is an effective "blood purifier," although millions upon millions of dollars have been spent for medicines in the belief that they were "blood purifiers."
- 13 That the secretions of the endocrine glands affect mental as well as physical efficiency and that they make us either ambitious and alert or dull and depressed.
- 14 That good health is largely maintained by three vital organs and fluids of the human body, which can be stimulated and invigorated by certain basic elements.

Science has succeeded in combining these elements in the new and revolutionary formula called Sargon, which may well be considered the greatest health-giving remedy of the age. In all leading cities where Sargon has been introduced, dealers are buying it in solid carload lots to supply the phenomenal and overwhelming demand.

Rundown and debilitated people by the thousands are reporting prompt recovery of health and bodily vigor through methods undreamed of a few years ago. Never before has any medicine aroused such widespread interest as Sargon which may now be obtained in Klamath Falls from the Magill Drug Co.

Railroad Asks to Take Lease on Small Line

WASHINGTON, July 24, (AP)—The Southern Pacific railway company today applies to the Interstate Commerce Commission for authority to lease the Nevada-California-Oregon railway.

The line is 155 miles long and view, Oregon, and Wendell, California. The application said this would provide a through route between Klamath Falls, Oregon and Ogden, Utah. In connection with the application of the Southern Pacific railroad for authority to lease the Nevada-California-Oregon railway, William F. Miller, general freight agent of the Southern Pacific, today said the Southern Pacific has owned a large interest in this road for three years.

the Nevada-California-Oregon line from narrow to standard gage. The purpose of leasing the line, railroad officials said, is to make it an integral part of Southern Pacific to simplify operation of the Klamath Falls to Ogden, Utah, through route. This route will be open about August 15 with the completion of the extension from Klamath Falls to Alturas, California. The Nevada-California-Oregon road is 155 miles long and extends from Lakeview, Ore., to

Miss Monterey Becomes Bride of Mr. O'Neill

NEW YORK, July 24, (AP)—Eugene O'Neill, playwright, was married in Paris yesterday to Charlotte Monterey, actress. It was announced today by Harry Weinberger, O'Neill's New York attorney. The couple was spending their honeymoon in the Tyrol. Mrs. Agnes Boulton O'Neill obtained a divorce from the playwright on July 2 in Reno, Nev.

One gallon of gasoline, when properly mixed with air, is equivalent to 83 pounds of dynamite.

SHE THOUGHT:
"Our first date—and our last."
Yet, to be polite,
SHE SAID:
"Wonderful picture! I'm glad we came."

A budding romance...almost shattered by "B.O."

(Body Odor)

THEIR first date! Bob was thrilled. Gladys, too—until she noticed "B.O."

Body Odor! She couldn't forgive that—even though it was a hot day. Then Gladys had an idea. She asked her brother, who was Bob's closest friend, to tell him the truth. Today Bob and Gladys are engaged. He's not guilty of "B.O." now.

Perspiration stays odorless

A warm stuffy day—crowds—excitement. How quickly at such times does perspiration make us guilty of "B.O." We can't always tell when we offend, because we become insensitive to ever-

present odors. But we can't avoid perspiring. Our pores give off as much as a quart of odor-causing waste daily.

Why risk embarrassment? Keep safe the delightful way millions know—Lifebuoy. Its refreshing, antiseptic lather deeply purifies all pores. After a Lifebuoy bath you actually feel the difference—a sparkling, wide-awake cleanliness that lasts. No fear of "B.O."

Complexions, too, stay fresh and smooth with Lifebuoy. It guards health—by removing germs. Lifebuoy's pleasant, extra-clean scent, which vanishes as you rinse, tells you it purifies. Adopt Lifebuoy today.
