THE TRUTH ABOUT CANDY

To Be Moderate Is Not to Gorge or to Undereat

A noted food authority states that attacks on candy lack a background of scientific insight. He reminds us that in addition to sugar, the best candies and confections of the present day contain also many other foods. He enumerates nuts, milk, cream, butter, gelatine, chocolate, and fruits, as being used along with sugar in delicious, modern candies, and he says that good candy as a dessert may become a wholesome part of a meal. Who, he asks, would deprive the world of one of its most delicious desserts?

Science and common sense are restoring sanity to the nation today. Don't gorge. Don't undereat. Prepare a great variety of all beautiful foods. Flavor these so that they will be delightful to the taste. Those are some of the present-day precepts that will guide us to a better diet.

If a dash of sugar will encourage your family to eat cereals, fresh, canned and stewed fruits, and milk in the form of milk drinks and milk desserts, then—in the name of health—use a dash of sugar. Try a dash of sugar when cooking vegetables in a small amount of water, and you will be surprised at how much fresher, more colorful and more delicious the vegetables are. A little sugar sprinkled here and there throughout the meal will encourage children and adults to eat the varied diet that is so necessary to health. Mouth-feeding with sugar. Good food promotes good health. The Sugar Institute.

WOOD

When you lift the receiver

Behind your Telephone stretches a wire fifty million miles long. These miles of wire and their connecting equipment must always be in readiness for the possible moment when you will desire to talk with anybody, anywhere.

Your wish at present may be to talk only with a friend in the next block, or a business house half a mile away.

But when you lift your receiver, 1,800,000 telephones on the Pacific Coast—19 million in the United States—are ready for your call.
