Good food promotes good health
A little sugar is so helpful in making the healthful foods delicious

HEALTH is an indispensable feature in the efficient life of this busy world. If most of us who were born healthy would eat and exercise properly from earliest childhood through adulthood, most of us would be strong, healthy and happy. Good foods, varied foods, balanced foods, are becoming more and more important in the art of keeping well. Nearly everyone knows that a balanced diet of milk foods, cereals, fruits, vegetables and meats are needed for health. But taste enters in and makes it hard for a great many people to enjoy the things they should eat. That is why sugar is being acclaimed as the world's greatest blessing when it comes to making a varied diet palatable and enjoyable. If people like the proper foods, they are almost sure to eat them.

A group of women cooking experts, working in a kitchen high up in a New York skyscraper, recently rediscovered an old secret that a dash of sugar added to vegetables while they are cooking develops their flavors, improves their colors, and makes them fresher and better to the taste. Sprinkle sugar over cereals and watch how much more the children enjoy them. Use sweetened milk desserts and note how much easier it is to get the members of your family to eat the amount of milk they should each day. Use fresh fruit salads with a sprinkling of sugar, and slightly sweetened stewed fruits for health and enjoyment. Remember a few cookies or cakes and ice cream for topping off the meal. A bit of sweet makes the meal complete. The Sugar Institute.
