TRY THESE CARROTS FOR JADED APPETITES

Hard to Resist the Flavor When Cooked This Appealing Way

A well-known woman cooking authority, realizing the importance of vegetables in the diet, has worked out this new recipe for *Flemish Carrots*:

Scrape 18 young carrots and slice lengthwise into thin strips like matches. Melt 6 tablespoons butter. Add carrots, 1 tablespoon sugar, 1 teaspoon of chopped parsley, and salt. Cover the pan and let simmer until tender, about 20 minutes, turning frequently with a spoon. Add cream, stir well, heat and serve.

Remember the importance of vegetable foods in the daily diet, and profit by the old secret rediscovered by four famous women cooking experts. Add a dash of sugar to each vegetable while it is cooking. The little sugar works wonders for freshness, color and taste.

Sugar is the supreme condiment for developing the delicate, natural flavors of fruits and vegetables so that children and adults will be tempted to eat variety. The balanced diet is so important in promoting health that it is well to serve stewed and fresh fruits daily. If your family does not drink enough milk, serve milk shakes, egg-nogs and milk desserts, such as junkets and custards. Add a dash of sugar to cooking cereal to develop its flavor. Serve cakes and cookies containing chocolate or coconut, ices and ice creams, canned berries and fruits, or candy for dessert. A bit of sweet makes the meal complete. The Sugar Institute.

GIANT DEFENSE GUN ON COAST

After being stared at by thousands of amazed citizens its transcontinental journey from Aberdeen proving ground, Maryland, a monster 14-inch railway coast gun arrived at the United States army arsenal on the Pacific coast recently.

This leviathan, one of the largest and most powerful pieces of artillery in the nation, will shoot a 1,400-pound projectile 25 miles. The exploding force of the projectile is so great, army officers say, that one shot would destroy an entire village 25 miles away.

For instance, a 25-mile radius around Portland, Seattle, Los Angeles, Denver or Butte could be laid bare by the big guns now with the installation of this most recent 14-inch coast weapon.

The gun is said to be strategically mobile, but not tactically mobile; that is it cannot be moved about at short notice on a battlefield, but it can be moved anywhere along a railway and when time permits a special track can be laid to take the gun to any desired point.

Here are some facts about this giant rifle:

It cost \$185,000 of which \$60,000 was for the gun and \$125,000 for the mount.

It's weight with carriage is 730,000 pounds, far greater than any locomotive.

Length, 25 feet, 4 inches; height of unit, 14 feet, 1 inch; breadth, 10 feet.

A crew of 60 men is necessary to man the monster with a total of 260 men necessary to fill every place in range and gun sections. It can be put in firing position in less than two hours under field conditions. If in permanent emplacement and if the fire control equipment is in place it can begin firing within a half hour.

The tremendous recoil is such that a trunion pull of 1,150,000 pounds is developed.

EARLY ARCHES

That the construction of the arch and dome was understood as early as 3500 B. C. has been proved by excavations at the site of Ur of the Chaldees.

NOT HOW MUCH but HOW MUCH SATISFACTION

Two thoroughly practical considerations will surely draw you toward Oldsmobile—price and value. For high quality at low price is the fundamental reason for Oldsmobile's constantly growing success. But even price and value are overshadowed by the complete and lasting satisfaction that comes with Oldsmobile ownership.

Consider the price—only \$875 for the two-door sedan. Compare what Oldsmobile offers you with what other cars offer. You will discover that it is doubtful economy to pay less than Oldsmobile's price...and unnecessary to pay more. For a car of lesser price will never bring you all that Oldsmobile offers...and you'll have to pay more than Oldsmobile's price to obtain the same fine qualities in another car.

Oldsmobile's big 62-horsepower high-compression engine provides ample power for every emergency—acceleration to take you out front when the

signal light changes—speed to keep you there.

Exceptional provisions for durability and dependability are evident in every detail of chassis construction. A low center of gravity combined with balanced weight gives uncanny roadability. Four Lovejoy hydraulic shock absorbers assure restful riding ease.

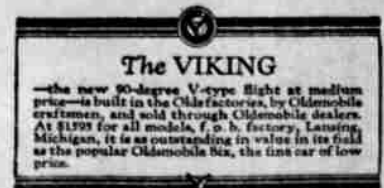

Examine the features of Oldsmobile's Fisher bodies. Test the wide, deep-cushioned seats. Note the glove-like fit of the soft upholstery fabrics—the luxurious quality of the materials used. Try the new comfort of the Fisher adjustable front seat.

Come and inspect this car. Drive it yourself. Compare its features with other cars. And when you have compared its price, and considered its value—keeping in mind that Oldsmobile stands high by a dollar-for-dollar measure...remember it stands even higher in the test of owner satisfaction.
