

Thoughts We've Been Thinking

Does a Sunbeam Pass Through the Air Unpolluted? Do You Know How Much Money \$2,500,000,000 Is?

The Way to Conquer Fear Is to Face It. Big Business Men Carry Heavy Insurance. Women Are Better Judges of Men Than Men Are of Themselves.

By BRUCE DENNIS

DOES a sunbeam pass through the air unpolluted?

One wise man insists that it does, but others insist that it doesn't. They say that environment, not only has a strong effect on children but it also has a heavy effect upon adults and their daily lives. People who are grown up some times lose their high ideals which they once possessed because of poor environment. It takes a strong character to carry the ideals through topsy turvey conditions.

ONE bank in the United States has a capital stock and resources of \$2,500,000,000. We have reference to the Corn Exchange Bank and Trust Company of New York, which has merged with the National City Bank. Nobody knows how much money that is. The average man has not financial mind enough to understand. One does know that banks can cut down expenses and operate the business with fewer employes by merger. But, on the other hand, one also knows that the chain banks never give the satisfaction to a local community that a substantial local institution gives which is manned by men who have personal interests and who desire to see it develop.

HOW many of us seek to escape from situations that are unpleasant by knowing facts? Invariably we try to force ourselves away from trying to consider the facts in front of us. We seek happiness in pretending not to see things as they are. We cannot fool ourselves long in that way. True, it is the height of folly to borrow trouble and to imagine a lot of conditions that do not exist. By the way, the imagination is a very dangerous enemy to mankind. Many people have a fear of death. They seek to avoid thinking about death. They never go to funerals. But, after all, the way to conquer fear is to face it.

IT is said that Pierre S. du Pont, of Delaware, is probably one of the heaviest life insured persons in the world. He carries life insurance now amounting to \$7,000,000. John Willys at one time a heavy automobile manufacturer, also believes in life insurance, he carries a little under \$2,000,000. Laasky and Zuker, of the movie picture industry, each carry \$5,000,000. The fact is, there are more than 300 American business men that carry a million or more.

Life insurance seems to be about the only pocket in the shroud. With it, men who are making big money, feel that they are laying aside a large sum which can be used after their death, and they can die with a feeling that they are providing for those who are near to them. In a way that is all right and in another way, it makes a lot of useless people who lean upon the life insurance that is left them.

WE believe that women are better judges of men than men are of themselves. To prove that, we have but to listen to the Business and Professional Women's Club of Oklahoma.

HUNTER SHOTS SELF

SALEM, Ore., Oct. 21 (AP)—Marion county's first hunting fatality this season occurred Sunday morning when Heroshi Kusachi, 22, a Japanese living at Des, Oregon, and visiting relatives in the Lake Labish district north of here, shot himself while on a hunting trip with three companions.

CONGRESS IS PROBING LOBBYING

Office Memorandum of Connecticut House Is Produced

CLAIM ASSOCIATION BEARS ALL EXPENSE

Eyanson Refutes That Part of Testimony by Stating That He Was an Employee of Bingham And That Bingham Did Not Represent the Association.

WASHINGTON, Oct. 21 (AP)—An office memorandum of the Connecticut Manufacturers' association, showing information on the secret tariff rate making session of the senate finance committee was produced today at the senate lobby investigating committee hearing.

The memorandum was written by J. E. Walcott, an official of the association, to Charles L. Eyanson, assistant to the association president, who aided Senator Bingham, republican, Connecticut, a member of the finance committee, during its deliberations on the tariff measure.

Produced by Walsh

The paper was produced by Senator Walsh, democrat, Montana, as Eyanson was recalled by the committee. It related the opposition of Chairman Smoot and Senators Edge and Reed, republican, members of the finance committee, to the ten per cent duty on rough hored shot gun barrels.

BALLOONS DON'T POP AT

Oct. 21 (AP)—Meers, who is 66 years old, put on a pair of plus-fours and went out with the boys early yesterday. The conversation turned to aviation and Meers had an idea. Inflate the knickers, he figured, and the wearer could float through space or upon the surface of waters.

With his companions he adjourned to a filling station and the plus-fours were pumped full of air. The boys then went to the roof of a small building on the Chicago river bank and Meers jumped.

Policemen pulled him out. "It's very strange," said Meers, wringing water from the trousers. "Probably it's the bum air one gets at the filling stations nowadays."
