

NEWS IN BRIEF

Character Close-Ups

NOSE, UPPER LIP AND CHIN IN THIS PROFILE ALL ANNOUNCE THAT THIS FELLOW IS SCOTCH EVEN IF HE'S A FRENCHMAN

Residing in New Home—
Mr. and Mrs. R. A. Lawson have purchased a new three-room home in the Homedale Garden tract and moved into it in time to spend Christmas in their own home. Mr. Lawson is employed with the Piggly Wiggly stores and has just recently returned to this city after a year's absence. The home was purchased through the office of the Fawell-Elley Realty company, according to Leslie Peyton, manager.

Attending Clinics—
Dr. G. H. Merryman has left for Chicago, New York and other eastern cities, where he plans to spend several weeks going through hospitals and clinics. He was accompanied as far as San Francisco by Mrs. Merryman and their two sons.

Leaving for New York—
Miss Gertrude Eckman of Gertrude's millinery store, left Sunday for New York on her semi-annual purchasing trip. She will go via Los Angeles, and attend the show at the Biltmore hotel, January 6 to 8.

Vacationing in California—
Joe F. Evans of Brown's paint store and Loren Osborn left Saturday afternoon for Stockton, Cal., to spend several days. They expect to be in San Francisco for New Year's Eve.

Motored to Medford—
Mrs. A. J. Lyie and daughter, Alexis, student at the University of Oregon who is spending the holidays here, motored to Medford Saturday, where they visited friends.

Will Study in California—
Miss Kathryn Walton, daughter of Mr. and Mrs. George Walton, expects to leave after New Year's for San Francisco, where she will spend several months studying music.

Left for Seattle—
Mrs. Josephine R. Briggs, widow of Dr. Clarence Edwin Briggs, accompanied the remains of her husband to Seattle, leaving Saturday night.

Visiting in City—
Miss Lillian Scofield, formerly of this city, is visiting here over the holidays with friends. Miss Scofield is now residing in Berkeley, Cal.

Visiting With Parents—
Miss Barbara Quinn is in the city visiting with her parents, Mr. and Mrs. James L. Quinn. Miss Quinn is a student at Oregon State college, but she may not return until the spring term or until next fall, but remain here with her parents.

Returned to San Francisco—
Mr. and Mrs. Tom Lewis have returned to their home in San Francisco, after a week's visit in this city with Mr. and Mrs. W. A. Jones.

Entertaining This Evening—
Mrs. J. H. Robinson of Pine Ridge is entertaining this evening in honor of Miss Clarice Elliott, prospective bride of the near future. Bridge will be enjoyed during the evening.

Returned From Reedport—
Mr. and Mrs. C. A. Henderson returned late Friday night from Reedport, where they spent the Christmas holidays with Mr. Henderson's parents.

Visiting in Los Angeles—
Mrs. J. O. Johnson and daughter, Maxine, left this morning for Los Angeles, where they will visit Mrs. Johnson's parents.

Have Returned From Portland—
Mr. and Mrs. J. J. Keller and Mr. and Mrs. George Humphrey have returned from Portland, where they spent the Christmas holidays with Mr. and Mrs. Paul Keller. Mrs. Paul Keller will be remembered as Miss Frances Humphrey.

Potatoes Are Almost Gone—
Out of the 250 bushels of Klamath Nettle Goms that have been on sale at the banks and the local chamber of commerce, only 30 are left. Anyone may obtain these prize winning spuds at any of the banks or at the chamber of commerce rooms.

Leaving for San Francisco—
J. J. Kestley, construction engineer for the Southern Pacific railroad, who has been working on the Modoc line, is leaving tonight for San Francisco, as his work is completed in this vicinity.

Returned From Portland—
Mr. and Mrs. Arthur Schupp returned Sunday evening from Portland, where they spent Christmas with relatives and friends.

Returned From Oakland—
Miss Dorothy Martin returned this morning from Oakland and San Francisco, where she has spent the past week visiting with friends and relatives.

Will Return Soon—
Mr. and Mrs. Walter Perkins and children are expected home immediately after New Year. The Perkins family has been visiting in California, near Corning.

Visiting in San Francisco—
Miss Dina Molotore left Sunday for San Francisco, where she will spend two weeks visiting with friends.

OREGON PIONEER PASSES
LEWISTON, Idaho, Dec. 30, (AP)—Mrs. Sathrah Ann Osborne, 81, La Grande, Ore., died Saturday at the home of her daughter where she was visiting. The body will be taken to La Grande for burial.

ESPEE AD MAN MADE MANAGER OF BIG OFFICE

Appointed as Head of Lord & Thomas at San Francisco.

Appointment of K. C. Ingram, advertising manager of the Southern Pacific company, as manager of the San Francisco office of Lord & Thomas and Logan, advertising agency, was announced yesterday by Don Francisco, vice president of the latter organization and general manager of its Pacific Coast office.

Former Newspaperman
Ingram, former San Francisco newspaperman, leaves the Southern Pacific company after nine years in its service, first as assistant manager of development and then as advertising manager. He is a graduate of Stanford University and has been prominently identified with advertising, transportation and community development on the coast for the past fifteen years. In his new post, he will succeed Dwight W. Jennings, who recently left San Francisco to take charge of Lord & Thomas and Logan activities in continental Europe.

New L. A. Manager
Francisco also announced the appointment of Duane D. Jones as manager of Lord & Thomas and Logan's Los Angeles office. Jones is a former newspaperman and magazine publisher and has been with Lord & Thomas and Logan in Los Angeles since 1923.

Handle Big Accounts
Both appointments will take effect January 1. Francisco will continue in his present capacity as executive head of the two offices, which handle the advertising of such representative Western concerns as the Sun-Maid Raisin Growers association, California Fruit Growers Exchange, Californians Inc., Southern Pacific company, Dollar Steamship Lines, M. J. B. Coffee, Associated Oil company, Union Oil company, All-Year club of Southern California, California Dairies, Inc., Jell-Well Dessert company, and others.

Eastern clients of Lord & Thomas and Logan include the New York Central Lines, General Electric company, American Tobacco company, Radio Corporation of America, Colgate-Palmolive-Peet company, Montgomery Ward & Co., Quaker Oats company, Pepsi-Cola company and International Mercantile Marine Lines. The advertising agency is one of the oldest and largest in the world. Its first Pacific Coast office was opened in 1915.

SUCKERS GET WISE
NEW YORK, Dec. 30, (AP)—Suckers are getting wise. The national better business bureau says that the public has learned so much about sound financial practice that high pressure promoters are having a hard time putting over fake stocks.

SAYS EARTH SOLID
BERLIN—Professor Franz Simon of the Physico-Chemical Institute has caused a flurry in scientific circles by his assertion that the center of the earth is solid and not a molten mass, as has been supposed. He claims the earth's core is kept solid by the enormous pressure exerted upon it from the weight of the soil on the outside.

BABIES WANTED
SYRACUSE, N. Y.—Mrs. Florence Grannis, county commissioner, wants 20 blue-eyed baby girls. She says that the number of applicants for adopted babies has increased to a point where the supply is insufficient. She has orders on her books for 20 babies at present, but isn't able to fill an order.

BOLD BRIGANDS
ATHENS—The romance of piracy is not extinct, but it has been modernized, as witnessed in the recent looting of a Greek ship near the port of Constanza, on the Black Sea. The pirates manned a ship with all the latest naval conveniences, including an airplane for scouting purposes.

TOTS TAUGHT TYPING
WASHINGTON Typewriting is being taught to children in kindergarten and primary grades in place of script in eighteen American cities now. Earl W. Barnhart, of the Federal Board of Vocational Education claims this system is better than first teaching longhand because the muscular actions of script are too complex for beginners.

CHIROPRACTIC FOR ASTHMA

The symptoms of chronic asthma are various in the different cases. The symptoms of the ordinary chronic case are included in the definition, but in that form known as spasmodic asthma the symptoms are more distinctive and similar in all cases. The first attack usually begins suddenly, but all following attacks may be preceded by dizziness, cold in the head, bronchial cough and thoracic constriction. Nocturnal attacks are more common and appear after a few hours' sleep when the patient is aroused with a distressing sense of want of breath and a feeling of great oppression in the chest. Soon the respiratory efforts become violent, all the accessory muscles of respiration are brought into play by the patient assuming some position which gives them additional support; in but a few minutes the patient is in a paroxysm of the most intense dyspnea. The face becomes pale, the expression is anxious, speech is impossible, the face may also be flushed and cyanosed. The cyanosis deepens, the inspirations are but a gasp and the patient fears impending death. Expiration is more hindered than inspiration, so that the chest is greatly expanded and the diaphragm in the lowered position. After some minutes or hours the breathing becomes easier and often, with a cough, the spasms or dyspnea may be broken and the patient falls in a deep sleep from the extreme exhaustion. The expectation of asthma is at first scanty, takes on the form of rounded, gelatinous masses and is raised with difficulty, but after a day or two the sputum becomes mucopurulent and is more profuse.

The Chiropactor seeks to adjust the subluxated vertebrae so that all pressure is removed from the spinal nerves, thus permitting free and unhindered transmission of the mental impulses from the brain to the bronchial tubes, which results in normal expression and normal function, hence normal breathing. The length of time required for this is different in different cases, and no estimate can be given for any case, but cases are on record where one adjustment afforded complete relief from the affection without its return, but as a rule several weeks or sometimes a few months' time is required to bring about a complete restoration of the normal condition.

The object of breathing is to get oxygen into the blood and waste gases out of it. Whenever the breathing center in the brain feels the need of more oxygen and less carbonic acid, and at the same time the passage of gas between the lungs and blood is interfered with, the condition is called asthma.

In asthma the patient feels the need of air. So far as he can see, there is no reason why his blood cannot take it up, but somehow or other it does not. And that is asthma—yearning for air which somehow cannot be satisfied. It is just a symptom, not a disease at all. Therefore Steadman's dictionary gives eighteen kinds of asthma.

Chiropactic is the science of Common Sense applied to the human machine and the art of adjusting the machine when it is out of order. It is the Science of Health and the art of adjusting the cause of disease. Every effect must have a cause. Disease is an effect. If you wish the effect to cease, get a Chiropactor to adjust the cause by Chiropactic adjustments. Modern scientific research proves that approximately a large per cent of all disturbances in the human structure follow nerve compression.

For instance, if you have something wrong in the nasal passage, or in the throat, or in the lungs, the heart, the stomach, the liver, the kidneys, the bowels, or, in fact, any part of the body, you may rest assured that it is due to an abnormal quantity of life current, and that the nerve supplying any one of these regions is under pressure at some point.

This interferes with the transmission of life current from the brain to the various tissues and organs of the body along its course.

The most frequent cause of nerve compression is a misalignment of the bones in the spinal column from between which the nerves pass as they leave the spinal cord.

Chiropactic further proves that scientific adjustments will be followed by the return of health.

Tariff to Protect Lumber Should Be Provided Early

By C. C. CROW
Editor, Crow's Pacific Coast Lumber Digest.
Without a question of doubt the government records for the 12 months just closing will show the heaviest influx of foreign manufactured lumber into the United States that there has ever been in a similar period.

Unfortunately, the condition of our domestic markets has been such that the stream of imports, which has steadily poured into the United States, has done a maximum of damage and has been felt by our own lumber manufacturers even more than it would have been ordinarily. The northwest manufacturers during the past six months have been continually harassed by a steadily growing volume of shipments from the mills in Canada into the rail markets throughout the middle west and eastern territory. It has been an exasperating situation to have to sit by and see prices hammered down to a point that is below the cost of production by mills that employ a large percentage of orientals while the American mills have only been able to give their crews part-time work.

Canadian Mills Dump Product.
Under ordinary conditions the Canadian mills are not much of a factor in the rail markets. During 1927 and 1928, when the prairie states of Canada had enjoyed several good wheat crops, the British Columbia mills were marketing their product in that field and were securing prices ranging from 50 cents to \$10 a thousand feet higher than the mills in the United States were securing on identical items on this side of the line. Our mills could have participated in this Canadian business but for the fact that the Canadian laws impose a 25 per cent ad valorem tariff on all of our lumber except that which is rough or surfaced on one side, a "rafty" provision which prohibits "raft" shipping in anything in the way of finished lumber for yard stock purposes.

The extremely bad conditions throughout the prairie states in Canada this year caused the Canadian mills to do an about face and to begin dumping their product in the United States rather than adjust their production to their own domestic demand, such as the American mills were trying to do with their markets. Of having established sales connections in the rail fields, many of the Canadian mills have authorized unscrupulous salesmen to get them orders regardless, with the result that they have hammered prices on many items of yard stock down from \$3 to \$5 a thousand feet and have caused many millions of dollars' worth of business to go to Canada that otherwise would have come into Oregon, Washington, Idaho and Montana.

Freight Rates Big Factor.
It has long been known that with the advantage which the British Columbia mills enjoy in freight rates to the Atlantic coast. Through the chartering of foreign bottoms, a privilege denied the American mills, they have ruined the Atlantic coast business. During the past 30 days a great deal of British Columbia lumber has been shipped into California, in fact, much more than there has been for many years, and while this has been hauled to some extent on American vessels, the sacrifice prices at which it has been bought have had a detrimental influence on cargo prices in California. It is very apparent that the Canadian competition at the present time is the most extended and damaging that it has ever been, and there is no relief immediately in sight.

While from a standpoint of the actual footage being shipped in, the Canadian competition is doing the most damage, it is interesting to note the leaps and bounds with which the Russians are increasing their exports to the United States. It is conservatively estimated that the Russians have sold between 50,000,000 and 60,000,000 feet of

lumber in the United States this year, which is a marked increase over 1928, and the extensive program which they have outlined for further increasing the output of lumber in Russia, together with their openly announced intention of "winning" the lumber markets of the United States make Russian lumber a potential menace which eventually will be as bad or worse than that of the Canadian mills.

Russia Has Huge Stumpage.
Many people do not realize that Russia has over three times the acreage of standing timber of that of the entire United States. With their cheap labor, the average worker being 40 cents a day, and the low transportation costs to our Atlantic coast ports, the Russian imports are a real threat.

One reason why the lumber manufacturers are so anxious that they be given some kind of protective tariff is the fear that before the tariff schedule is taken up for readjustment again, the average life of a tariff revision since 1897 having been eight years, it is not improbable that Russian lumber will be dominating the Atlantic coast business.

It is futile for the American lumber manufacturers to attempt to regulate production to meet a shrunken demand when they are confronted with the unrestricted imports, for, as has been the case this year, as the consumption has fallen off the Russian and Canadian manufacturers have taken an increasing footage of the available business and have steadily hammered price levels down.

Need of Tariff Shown.
In one way this promises to be a benefit, as the need of a protective tariff on lumber and shingles was never more emphasized, for such an abundance of specific evidence can now be offered, showing glaring impositions by the foreign manufacturers that it is doing much to convince opponents of the lumber tariff that if this strangle hold is not broken it will spell ruin for the northwest lumber industry. Producing as it does 60 cents of every dollar coming into Oregon and Washington, the prosperity or the lack of it for the lumber industry has a far-reaching effect on business of all kinds.

BLINDED BY ACCIDENT

GRANTS PASS, Dec. 30, (AP)—Carl Pesterfeld, farmer, was in a hospital here today, suffering injuries received when a circular saw busted. He was blinded. Physicians said he probably would recover.

Governor Norblad Issues Requisition

SALEM, Ore., Dec. 30 (AP)—Governor Norblad today granted the extradition of Dorothy and Hartley Crosby on a requisition from the governor of Idaho where they wanted in Ada county on a charge of obtaining property by false pretenses. They are under arrest in Portland.

Sackett Slated For German Ambassador

WASHINGTON, Dec. 30, (AP)—President Hoover intends to submit to the senate next Monday the nomination of Senator Frederick M. Sackett of Kentucky as ambassador to Germany, and the early resignation and departure of the senator for Berlin are expected.

PROFESSOR IN CITY
Robert Griffin, instructor in public speaking at the University of Nevada, is in Klamath Falls visiting with relatives and friends while on his Christmas vacation from the university. He is a graduate of Oregon State College.

ALFRED E. HAS BIRTHDAY

NEW YORK, Dec. 30, (AP)—Alfred E. Smith is 56 years old today, and there will be a family party in his Fifth avenue apartment. On January 8 he is leaving for a three week's vacation in Miami with William F. Kenny and John J. Raskob.

The next total eclipse of the sun visible in America will occur on April 28, 1930. Its path will cross Central California and Northwest Nevada.
